CONRAD

OPEN DAYS

GROUND PLAN

C (Y)OUR FUTURE

Come in and explore our premises with our interactive QR code tour. This floor plan guides you through all departments and facilities across both floors.

Get to know Conrad from the inside. Discover how (y) our machines are built. From engineering to production, testing and service.

HOW DOES IT WORK?

Start at the main entrance and choose your own route. Begin upstairs or start on the ground floor near our newest expansion. Each section has its own QR code with further information.

BUILD (Y)OUR OWN MACHINE

In the Cut & Bend department, you can pick up your own SBM 50 E-6 scale model kit.

Step by step, you build your own model and see how a machine comes together just like we do it at Conrad.

The SBM 50 E-6 is our fully electric drilling rig for dewatering, developed for projects with strict environmental requirements.
