

Brexit Bad Boys and Members of the GOP join Nigel Farage in push to replace the WHO

LONDON, x June 2026 – Action on World Health (AWH) is pleased to announce key figures from the UK Brexit movement and prominent members of the US Republican Party have joined the organization in a major restructuring that strengthens its campaigning and research functions.

The organization will now operate through two new nonprofit entities in the United States: **Action on World Health Campaign Limited**, a nonpartisan, grassroots 501(c)4 organization that will drive the political and public case for replacing the World Health Organization (WHO); and the **Action on World Health Foundation**, our new research affiliate and 501(c)3 charitable organization that will use research, analysis and educational material to advance international reform and continue the work we have started on a new model to replace the WHO.

Both entities are governed by Boards that are comprised as follows:

- [Nigel Farage MP](#), Co-Founder & Honorary Chairman, Action on World Health Campaign Limited and the Action on World Health Foundation
- [David Roach](#), Co-Founder, President & CEO, Action on World Health Campaign Limited and the Action on World Health Foundation
- [Andy Wigmore](#), Treasurer, Action on World Health Campaign Limited and the Action on World Health Foundation
- [Amanda Moslé Friedman](#), Secretary, Action on World Health Campaign Limited and the Action on World Health Foundation
- [Greg Swenson](#), Member, Action on World Health Campaign Limited and the Action on World Health Foundation
- [Gerry Gunster](#), Member, Action on World Health Campaign Limited
- [Kerri L. Bickford](#), Member, Action on World Health Foundation

AWH Co-Founder, President & CEO, David Roach, said: *“The WHO is not fit for purpose. It helped China cover up COVID, it’s compromised by vast private funding, and has become a far-left campaign group; lobbying governments for whatever is the latest trend among the woke establishment, whether it’s net zero extremism, higher taxes on working people, or gender ideology.*

“With the United States and Argentina having left, now is the time for a new model of international health based on sovereignty, accountability, and value for money. It is an ambitious goal, but with such an impressive team joining our new boards, I am confident our ambition can be realized.”

Action on World Health is a nonpartisan, grassroots organization dedicated to creating a better vision of international health by replacing the WHO with an entirely new body that sits outside the orbit of the United Nations, and the influence of the Chinese Communist Party (CCP). Co-founded by our Honorary Chairman, Hon. Nigel Farage MP, we work to improve public health, medicine, and accountability at an international level by exposing the globalist, corporatist and woke agendas that have damaged the WHO; and by creating and promoting a better vision and model for health and the international order. We believe countries should cooperate on health by sharing information and providing guidance through an international health agency that respects national sovereignty and bodily autonomy. Neither the WHO, nor any other international body that replaces it, should be dictating policies that override national interests and the rights of free people.
