### RHB302 retake Exam Questions with 100% Correct Answers | Verified | Latest Update 2024

charge router charge review workqueue - Correct Answer-these workqueues perform independent charge integrity checks. If a charge session contains charges with errors that session is routed to a charge route review workqueue for reconciliation.

HB charge review workqueue - Correct Answer-are HB-specific charge integrity issues. If a charge has an error, it remains behind in the respective HB charge review workqueue while clean charges in session post to the hospital account.

decentralized charge review - Correct Answer-the department managers are responsible for performing their own charge review and reconciliation. this is a essential for allowing charges to post to a hospital account in a timely manner. Epic recommends this one.

application-specific level - Correct Answer-checks use workqueue situated in front of the hospital accounts to catch charges before they post.

generic-level - Correct Answer-checks use workqueue within the charge router.

centralized charge review - Correct Answer-all charges errors are reconciled by the central billing office staff.

charge router charge review workqueues versus hb charge review workqueue - Correct Answer-

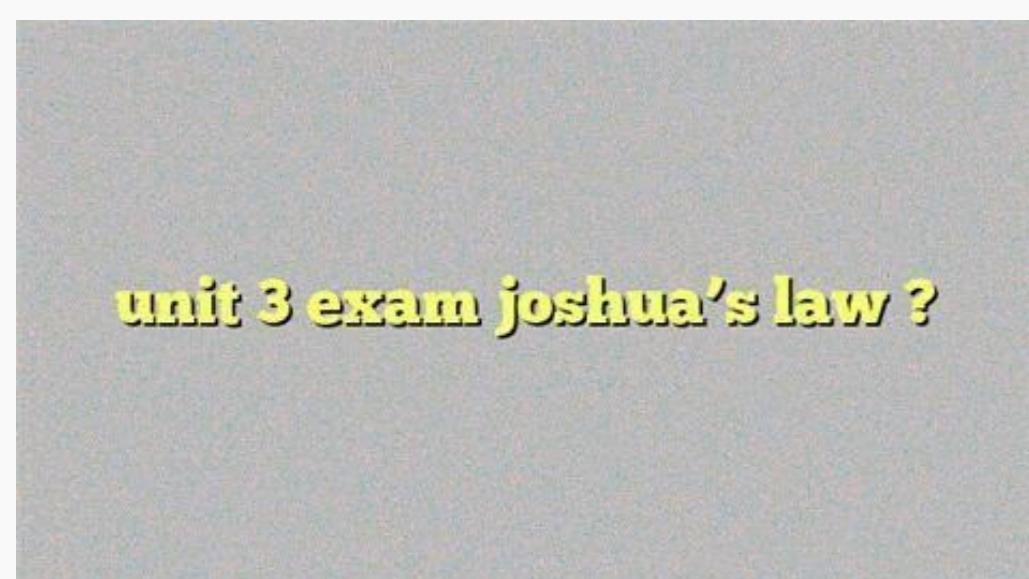

centralized charge review versus decentralized charge review - Correct Answer-

two places where workqueues rules can be created - Correct Answer-rule maintenance module directly within a workqueue

workqueue rule - Correct Answer-defines the problem with the account. why is follow up necessary? If there are no workqueue rules, NOTHING will qualify for the workqueue. where to build rule maintenance or within the workqueue itself.

routing rule - Correct Answer-filter or breakup a workload and due to this function, these rules tend to be very basic with only one criterion.
