WHY EZ-StopDrill Kit?

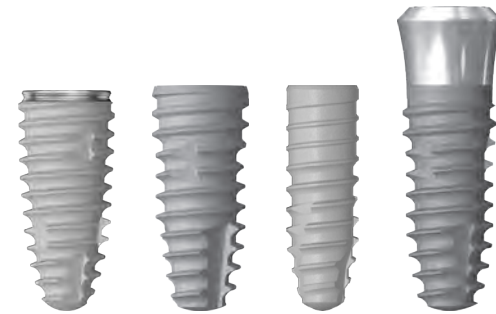

A variety of surgical drills are available for each fixture diameter and length.
And built-in stopper design eliminates the need for a separate stopper to enhance treatment convenience.

EZ-StopDrill Kit Features

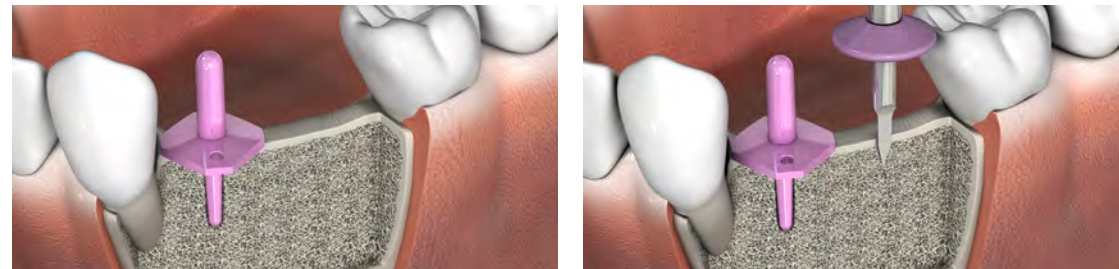

01/ Compatible with IS-II Active, IS-III Active and IT-III Active fixtures

Surgical drill and Fixture driver for each types
(IS-II active / IS-III active (S-narrow) / IT-III active)
(Requires S-Wide kit for over Ø5.5 fixture)

02/ To check insertion distance in between adjacent implant

Uses the MD spacer and MD parallel pin in the multiple case, to recognize the insertion distance or orientation in between adjacent implant, also enables to consider the mesio-distal length of crown (Ø4.0 to 9.0)

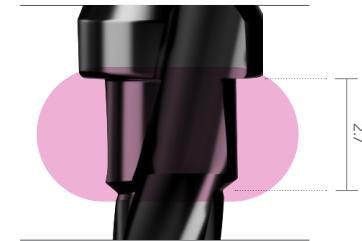

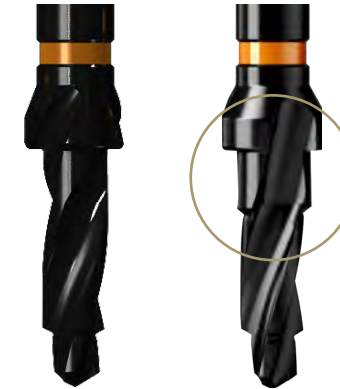

04/05

03/ Simplified drill sequence for fast and simple fixture placement

By adding the cortical shape to the existing StopDrill, no additional Cortical Tapping and Drilling are needed.

As is StopDrill
