

Looking for high-quality relevant online reading material to give to your students? **ScienceDirect** has the content for you!

“Elsevier **ScienceDirect** saved me time researching, helped me to find resources with information about specialized topics, and exposed me to connections across a subject.”

—ScienceDirect User,
Educational Institution

Content tailored for undergrad and grad coursework, education and learning

250+ textbooks (P&C)

Written for undergraduate students to provide coverage for a common course, and featuring pedagogy and often ancillaries* to support academic use.

710+ hybrid text / references

Hybrids provide another foundational content layer for students and researchers. They are at a higher level than pure textbooks and ideal for graduates or post-docs as well as early career and interdisciplinary researchers.

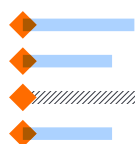

35K reference books

Monographs provide depth and context, while review articles offer a broad overview of the main developments in a subject area and a summary of the current state of understanding in a topic.

6,600+ serials / series and handbooks

Serials and handbooks present a comprehensive snapshot of the current state of research, building upon that foundation over time. They cover topical subjects and review the latest research into methods and protocols.

200+ major reference works

Written to build foundational knowledge in a field and instill confidence in new subject areas; also supports interdisciplinary research. MRWs support foundational learning for undergrad and grad; supports interdisciplinary exploration for graduate, post-doc and beyond.

users in 2020

"I visited ScienceDirect to find new information for my assignments. I always open a few more tabs for any related research papers but with ScienceDirect topic pages, it helps me save my time researching any information as it really exposes various connections across one topic and others."

—AhliyasahAida Farihin,
Student, UMP

"Helped me quickly clarify a simple topic for the class I am teaching!"

—Graduate Student,
Educational Institution

"They made the article more clear and provided an easy way to make sure one had a full understanding. I thought it was very helpful. I could contain my searches to the article without wasting time looking information up elsewhere."

—Student response,
Lafayette College
