

Empowering Educators with Trusted, Engaging, Curriculum-Aligned Tools to Train Tomorrow's Doctors

Every pathway is different.

Every destination the same: **Great doctors.**

Navigating your challenges together

Medical educators face significant challenges, including managing long to-do lists, limited time, difficulty engaging students, accommodating diverse learning preferences, and addressing students' increasing reliance on unreliable resources. With over 130 years of expertise, McGraw Hill provides interactive and trusted learning solutions, along with bespoke curriculum mapping services, to help streamline teaching and enhance student engagement.

✗ Lack of interactive resources to meet the needs of today's students	➔	✓ Unlimited online content & multimedia resources to support you in 38+ disciplines
✗ Overwhelmed instructors - lack of time to review and select from thousands of resources	➔	✓ Full curriculum resource mapping to your syllabus and learning objectives
✗ Unengaged students and decreased performance	➔	✓ Resources cover diverse teaching/learning styles, to engage with all types of learners including those demanding more interactive and engaging resources
✗ Unreliable online content and resources	➔	✓ Unlimited access anytime, anywhere to high-quality resources, developed by world-renowned authors, curated by experts and continually updated
✗ Overall dissatisfaction in the shifting educational system	➔	✓ Wraparound services including ongoing tailored training and support for faculty & students

Preparing the doctors of tomorrow

Providing always
up-to-date innovative content
from trusted experts

Supporting diverse
teaching and
learning styles

Aligning
materials with
your curriculum

Delivering interactive
and engaging resources
for today's students

Turning knowledge into clinical
confidence

Offering ongoing
support for both faculty
and students

**Whether your curriculum
is traditional or integrated,
and regardless of
your teaching and
learning approach, our
comprehensive solutions
have got you covered!**

Comprehensive and engaging interactive resources for all medical specialties

Comprehensive book content including the latest editions of fully searchable landmark texts such as:

Vast multimedia libraries: Examination and procedural videos, patient safety modules, lectures, podcasts and audio files, animations, anatomy modules, infographics, high resolution images, and more.

A wide variety of **quick-reference and differential diagnostic tools** to facilitate decision-making at the point-of-care.

Basic science and clinical cases to explore and acquire knowledge and skills needed to master real patient scenarios.

Integrated drug database with detailed information for generic and brand-name drugs.

Customizable patient education handouts for adults, pediatrics, and medicines in multiple languages.

Comprehensive test preparation with thousands of self-assessment Q&A.

With the Access mobile app, students can search and access trusted content anytime, anywhere, making studying easier and more efficient.

Empowering Teaching and Learning with Tailored Curriculum Mapping

Our curriculum mapping service is designed to make your job easier and enhance the learning experience for your students. It provides a comprehensive and integrated approach by aligning our educational resources—including textbooks, case studies, multimedia, and interactive modules—with your institution's curricula and syllabi.

With coverage across all medical specialties, this service ensures that every topic is addressed using the most relevant and high-quality materials, tailored to your educational needs to support better teaching and learning outcomes.

Bridging the Gap Between Knowledge and Practice

Medical education is not only about acquiring knowledge—it's about preparing students to apply that knowledge confidently in real-life clinical scenarios. Medical cases bring theory to life, helping students apply what they have learned to real-world scenarios. They sharpen clinical reasoning, foster critical thinking, and build confidence for patient care.

The Challenge? Time and Resources

Creating, approving, and updating cases takes time, collaboration across departments, and effort—barriers that often prevent their full integration into teaching. That's where we can help.

Our ready-to-use case solutions save you time and effort—making it easy to bring clinical relevance into your curriculum.

Case Files Collection provides you with thousands of cases to use in exams, homework assignments or for in-class discussions, helping students to reinforce specific knowledge and apply it to practical situations saving you countless hours of preparation time and effort.

casefiles.mhmedical.com

- ▶ A complete collection of basic science, clinical medicine, and postgraduate-level cases from the trusted Case Files® series.
- ▶ Personalized features that let students monitor their progress and easily pick up where they left off.
- ▶ 90+ Case Files® podcast episodes, narrated by series editor Dr. Eugene Toy, bring key cases to life in an engaging, conversational style.

Case Files: Teaching Cases® and AccessWorldMed on next page ▶

AccessWorldMed offers two types of cases: complex, localized cases designed for advanced students, and comprehensive cases ideal for Problem-Based Learning (PBL) approaches—making it easy for educators to integrate them into their teaching.

Critical thinking for tomorrow's clinicians

Developing strong clinical reasoning skills is essential for preparing competent and caring physicians. At the core of clinical competence lies diagnostic reasoning—the ability to efficiently gather information, narrow a differential diagnosis, and make accurate decisions to reduce diagnostic errors and improve patient outcomes.

Clinical Reasoning by McGraw Hill is a digital learning tool designed to help future clinicians build confidence in their diagnostic reasoning skills using a structured, evidence-based framework.

**Coming
Fall 2025!**

- ▶ **Comprehensive Content:** Covers all major adult symptoms and common lab abnormalities.
- ▶ **High-Yield Illness Scripts:** Over 600 scripts covering classic and uncommon presentations, risk factors, symptoms, signs, and workup strategies.
- ▶ **Critical Alerts:** Icons highlight life-threatening or must-not-miss diagnoses.
- ▶ **Interactive Cases:** AI-powered patient encounters let users apply knowledge, receive targeted feedback, and engage in deliberate practice.

- ▶ **Diagnostic Comparison Tools:** Side-by-side workup tables streamline differential diagnosis processes.
- ▶ **Structured & Evidence-Based Approach** centered on pivotal decision points and reinforced with visual algorithms to guide learners through each step of symptom evaluation.
- ▶ **Expert-Developed:** Created under the leadership of Editor-in-Chief Dr. Scott Stern, drawing on 20+ years of expertise and proven frameworks to strengthen diagnostic and clinical decision-making.

Give students the tools to reason better, diagnose smarter, and become more confident clinicians.

From understanding to exam success—support your students with high-yield, visual learning tools

Today's students learn differently. They expect clear, visual explanations and concise, high-yield content that helps them connect concepts and prepare efficiently for classes, exams, and clinical rotations. Supporting their learning outside the classroom allows you to save time on foundational content and focus on deeper discussions in class.

Two powerful solutions working together to deliver improved learning outcomes

The integration cross-references our authoritative **First Aid** high-yield content with the engaging video lectures and quizzes of **Boards & Beyond**, providing comprehensive coverage across the entire learning journey—pre-clinical, clinical, and beyond—in formats that suit all learning styles, enhancing study efficiency and outcomes.

First Aid Forward: 2,900+ high-yield facts, 2,000+ active learning quizzes, cases, and clinical algorithms.

Boards & Beyond: 800+ video lectures and 3,500+ board prep quizzes.

- ▶ Allows faculty to track student progress and support at-risk learners using combined analytics and tools.
- ▶ Integrates with **AnkiHub**: Students can seamlessly access First Aid Forward and Boards & Beyond content while using Anki flashcards.
