# Revolutionizing manufacturing with cutting-edge technology

Osedea is a Montreal-based innovation firm specializing in design, software engineering, and AI implementation of technological solutions tailored to your needs.

Development

Design

Artificial Intelligence

Robotics

# What sets us apart

# Manufacturing expertise

10+ years of experience across industries like automotive, aerospace, and pulp and paper, empowering us to tackle your manufacturing challenges.

# Empowering your operational efficiency

We lead the way in Industry 4.0, specializing in IoT, big data analytics, and Digital Twins to help manufacturers digitize operations and prepare for the future.

### User-centric approach

Custom-built solutions designed to meet the specific needs of on-site and operational teams.

#### Cybersecurity

SOC 2 Type 2 compliance, ensuring the highest standards of data security, privacy, and confidentiality.

# Al, innovation, and robotics

## Al expertise

We deliver custom AI solutions, including computer vision, NLP, and predictive models, to automate quality assurance process and seamlessly integrate cutting-edge technologies into your operations.

# Smarter quality control with computer vision

Integration of computer vision systems to enhance quality assurance and real-time production inspection processes, improving defect detection and product traceability.

# Robotics: automated inspection and reducing unexpected downtime

Our robotic solutions, powered by Boston Dynamics' Spot, enhance predictive maintenance and data collection, boosting your plant's safety and efficiency while reducing unexpected downtime.

## Maximizing production efficiency

Our software streamlines workflows, optimizes scheduling, and offers real-time monitoring of key KPIs, enabling data-driven decisions to boost efficiency and productivity.

Kruger 7

Empowering heavy machinery operators to make good decisions through real-time data

Promark Electronics 
Scaling Al for smarter

manufacturing inspections

NanoXplore 7

Assisting quality control in manufacturing with AR & AI

Boston Dynamics 7

Reducing unplanned downtime in aluminum smelting with Spot's advanced tech
