

Accelerate:

Modern Chronic Disease Care for Rural Clinics

Ideal for Rural Health Transformation Program

Accelerate is a Quality Improvement Program designed for providers ready to tackle chronic disease in an entirely new way. MedsEngine delivers scalable, and sustainable improvements across multiple chronic conditions helping clinics achieve financial, quality, and patient-satisfaction goals.

The Rural Reality

- Sicker, more complex patients
- Fewer providers and rising burnout
- Higher expectations for outcomes
- Limited funding and workforce
- Increasing quality and audit pressure

Why It Matters

Every rural clinic is judged on:

- Hypertension control
- Diabetes outcomes
- Preventable complications
- Quality reporting and audits

➤ MedsEngine turns these from risks into strengths and competitive advantages

What MedsEngine Delivers

Better Outcomes:

- Rapid control of hypertension, diabetes, and lipids
- Point-of-care evidence-based recommendations
- Entire populations with improved care

No New Burden:

- Fits naturally into provider workflow
- Integrates securely to your existing EHR
- Go live in approximately 20-30 hours
- SOC2 Type 2 compliant

Rural-Ready by Design:

- Improves APP skillset and confidence
- Uniform and consistent provider care
- Works in small clinics and multi-site systems

BP Control Rates to <140/90
(Supports new <130/80 AHA target)

Without
MedsEngine

US Average: 48%

Premier: 85%

(18 mmHg systolic reduction)

With
MedsEngine

PriMed: 92%

(22 mmHg systolic reduction)
