## ABOUT US

---

OLLER based in Dubai, is a leading distributor of premium elevator components across the Middle East and GCC. As the exclusive representative of globally renowned manufacturers Brugg Lifting and Savera, OLLER ensures the highest standards in elevator safety and performance. By partnering with additional industry leaders like Arkle and Fermator, OLLER offers a comprehensive portfolio of products, including guide rails, wire ropes, control systems, and automatic doors, providing tailored solutions for a variety of elevator applications.

At OLLER, we are committed to delivering exceptional quality and reliability to our clients. We focus on building long-term relationships with elevator companies, ensuring that they have access to world-class products backed by expert support. Our dedication to customer satisfaction and our emphasis on delivering value are what set us apart in the region's competitive market.

Our goal is to continuously raise the bar in the elevator industry by offering cutting-edge solutions that enhance safety, performance, and efficiency. We strive to be recognized as the most trusted distributor in the region, known for our integrity, expertise, and ability to meet the evolving needs of our clients with the finest products and services.

# Guide Rails

## ABOUT SAVERA

---

Savera is a leading Spanish manufacturer of elevator guide rails, known for its high-precision engineering and durable products. With a strong focus on safety and performance, Savera supplies guide rails to elevator companies worldwide, ensuring smooth and reliable operation in both residential and commercial applications.

**SUPER** rails meet or exceed the requirements of ISO 7465. **SUPER** offers the best performance in the industry for a “standard” rail.

**EXTRA** rails meet or exceed the requirements of ISO 7465 (Class 1) and offer 100% control of straightness. When ride quality is important in high-rise installations, **EXTRA** is for you.

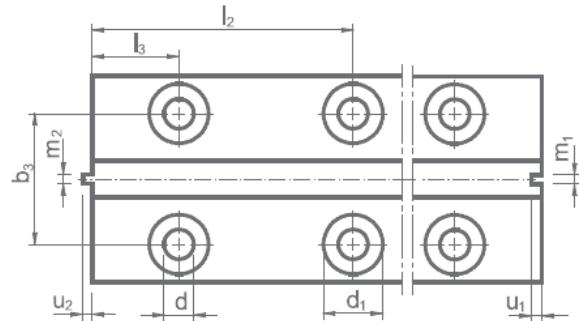

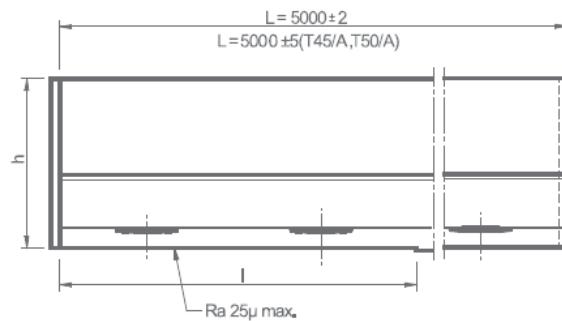

**STAR** rails are the ultimate in quality and performance. The tolerances and straightness of **STAR** rails are unique to the entire industry. **STAR** is a must for high-speed high rise projects. **STAR PLUS** is the highly acclaimed rail system for the ultimate in ride quality.

## Doors Systems

**Fermator**  
AUTOMATIC DOORS FOR LIFTS

## ABOUT FERMATOR

---

Fermator is a global leader in the manufacturing of automatic elevator doors, known for their focus on safety, durability, and precision. With decades of industry expertise, Fermator's products are trusted for their quality and seamless performance, meeting international standards and serving clients in over 90 countries.

Fermator's product line includes single, double, and multi-panel sliding doors, as well as fire-rated and heavy-duty doors. These solutions are designed for various applications, from residential to high-traffic commercial buildings, ensuring smooth integration and reliable operation across different elevator systems.

## DOOR MECHANISMS

---

### GENERAL FEATURES

Noise level	< 53 dB.
Total weight	Reference: T2 PL 800 mm HL 2.000 mm 120 x 60 mm frame, with sheet metal panels - 71 kg.
Safety closing system	With spring.

### INSTALLATION

Pre-adjusted and tested to simplify the installation.

## DOOR PANELS

---

The Compact Line from Fermator offers a range of space-saving elevator doors, designed for smaller shafts without compromising on performance or safety. These doors are ideal for residential and low-traffic buildings, combining smooth operation with durability and easy installation. Compact doors are suitable for up to 350,000 c/y and lift speeds of under 2m/s.

The ELITE Line is Fermator's premium range of automatic doors, built for high-traffic and commercial applications. Known for their robust construction and advanced technology, ELITE doors ensure reliable operation, enhanced safety features, and minimal maintenance, making them ideal for demanding environments. Elite doors are suitable for high traffic areas with up to 800000 cycle per year and speeds of up to 2.5 m/s.

# Control Boards

## ABOUT ARKEL

---

Founded in 1998, ARKEL A.Ş. is the leader in R&D and engineering services and production of lift control boards, control panels, emergency rescue systems, inspection boxes, alarm sets, VVVF drives, integrated lift control units and other electronic devices.

ARKEL exported its first product in 2003, introducing EN81-1/2 lifts standard in 2005 during the process of integration of Turkey with the EU. Since 2006, the Company has been marketing its products to the EU countries.

ARKEL currently exports its products to many countries in the Middle East, Africa, Europe and Asia and Australia.

## ARCODE

---

ARCODE is an advanced elevator control system designed to optimize performance and energy efficiency. With a focus on reducing operational costs, ARCODE offers seamless integration with existing elevator infrastructures and features smart traffic management to minimize wait times.

Its user-friendly interface and robust security features set it apart, making it an ideal choice for buildings looking to enhance passenger experience while maintaining cost-effective operations.
