#### Details of Incident \*

- Machine is a K105 running on a Case 340 Magnum tractor, spreading Urea @ 150kg @ 14km. spreading 36m wide.
- Machine is 11 months old and has spread 15000 ha's.
- Spinner speed was erratic, then spinners stopped turning.
- Inspected at the rear of the machine and found hydraulic oil leaking around seal of motors.
- Tested PWM Valve, not working.
- Inspect tractor to confirm issue is not coming from there.
- Contacted Bredal specialist to confirm correct course of action moving forward.

NOTE: Include cause of incident and diagnosis

#### Details of Repair \*

- Pulled spinner motors off and stripped down,
- Found they had failed internally, because of PWM Valve failure.
- Fitted 2 new motors and PWM valve.
- Flushed lines to make sure machine is free of any metal shavings or shrapnel.
- Inspected complete machine for any other signs of wear or problems
- Fitted hoses up again and tested the machine in yard for 1.5hours, all fully operational.
