

Grants Pass School District 7

Huddle Up partner since 2023

Grants Pass School District (GPSD) is among the largest districts in southern Oregon, serving approximately 5,700 students across 12 campuses. Over 800 students in the district qualify for IEP services.

The Challenge

How to find reliable care for 800+ IEP students district-wide while ensuring predictable and fair pricing?

Due to their rural location and subsequent lack of local providers, GPSD was an early adopter of virtual care to deliver speech therapy so they could meet the needs of their large IEP population. However, the district was left unsatisfied with their previous provider group, as they felt the providers were misdiagnosing students in order to qualify them for additional care, tacking on unnecessary service minutes to maintain hours.

The Solution

Our transparent cost structure, allowing districts like GPSD to properly budget

After talking with Huddle Up and learning more about our straightforward pricing structure, GPSD decided to give us a try and assign a small portion of their caseload needs to our providers. After a great initial experience where the district could consistently predict what they would pay for services each month, the district decided to expand the partnership, with Huddle Up now servicing 100% of GPSD's speech teletherapy needs.

Our Partnership

1,700+

Sessions delivered during the '23-24 school year

350+

Students served

320+

Hours of care delivered each month

10

Schools serviced

“

What does Huddle Up do really well? Communicate when issues may arise and problem solve with districts ... **The customer service and providers are excellent.**
