

TAM 2.1 DATE AUGUST 17, 2026

Release Notes

Echometer is excited to announce the official release of TAM version 2.1!

MAJOR FEATURE UPDATES:

- **Language Translation:** TAM software was translated into Spanish, Ukrainian, and Russian.
- **Cloud Sync:** Added a search workflow for wells based on "Cloud Last Modified" time and "Date of Test". Updated well status icons to indicate local/cloud presence.

Cloud/Server Updates

- **EchoCloud Service:** Added "Cloud Last Modified" tracking to support TAM search functionality. Updated default Well Trends and Group Well Trends to include ACU Casing Pressure and Distance to Liquid.
- **Integrated API:** Added the ability to use API to pull data that has been uploaded to the cloud to company systems. Well file imports through API for bulk well file creation.
- **Merge Function:** Added function to cloud.echometer.com that allows Admins to merge well files in the cloud environment.
- **Sub Account Management:** Added view where sub accounts are listed indented to main account in list.
- **Well List:** Added search bar to well list for easy well query.
- **RAM Admin Service:** Added support for enabling/disabling swagger pages.

Bug Fixes & Improvements

- **General:** Resolved text clipping, centering, and translation issues across the DYN Raw view, Reprocess Dialog, Well plot options, and Setup Hardware Dialog.
- **Rod Database:** Updated High Strength rod string calculations and H-API/Corod SE-Weatherford values.
- **Liquid Level:** Enabled unit switching for Dual Shot test Cross Communication markers (no longer locked to US units).
- **DCL Unit:** Updated labels and display layouts for Kg/cm² (g) and Kg/cm² (a) pressure units to improve readability.
- **Miscellaneous:** Updated UI icons for well removal to an "X" and updated translation files from Spanish, Ukrainian, and Russian feedback.
- **Localization:** Added language selection dropdowns in the main title bar and license agreement screens.
