# Ardelino

## AI-powered Telemetry and Vending management software for unattended retail

Make decisions based on data,
not feelings

# Integrated System for Unattended Retail

*A complete solution for remote monitoring and Vending Machine management*

## We offer

- Data to drive your business decisions

- AI-powered insights via a simple bot-assistant

- Unified analytics for all machines, regardless of manufacturer or protocol

# Advanced Telemetry Solution

*Deep analytics in a user-friendly interface for business owners and operators*

- View **dashboards** and reports on **sales, inventory, maintenance** and **cash collections**

- **Compare** performance **across locations** and find the **best product combinations**

- **Save money and time** on machine servicing and inventory management

- Get **alerts** for breakdowns or ingredients shortages

# AI-powered assistant

*Deeply integrated AI-powered chatbot*

Get **instant insights** from your data, even **on-the-go**

Receive **recommendations** based on your stats and industry trends

Use **simple conversational style:** ask in a **text or in a speech**

# No Need for a Separate Telemetry Device

*Ardelino VMS **integrates directly with POS terminals,** allowing data to be transferred seamlessly to your Ardelino account*

**AURENCY VPOS**
Cost-effective high-speed universal terminal with built-in SIM card

**VENDOTEK TERMINAL**
Terminal with built-in SIM card

**?**

**ANY OTHER POS**
Custom integration available for nearly any POS-device

# Why Ardelino?

- **24/7/365** technical support
