## **Pulse interface**

Accepts payments from contactless bank cards on Pulse machines

Can be used on car washes, slot machines, water dispensers, massage chairs and other devices with the Pulse interface

## **IP67 protection**

Waterproofed terminal for accepting contactless payments for outdoor use

Full protection against dust and water according to IP67

## **MDB control**

MDB is a standard protocol for real-time data transmission

Is widespread among vending and OCS machines and allows to integrate them with telemetry & VMS systems and form EVA-DTS reports

# Acquiring options

# Pre-integrated with telemetry

A complete vending telemetry solution for any unattended machines.

Set alerts, get instant info and manage:

- inventory (stock, route planning, prekitting)
- cash (cash collection, change)
- sales (statistics, analytics, reports)
- machine status (remote device control)

# Warranty and support

- We provide high-quality tech support
- 1 year warranty
- Online system status and notifications via TMS portal
- Support 7 days a week
- Free replacement instead of repair within 1 year
