

PV & SOLAR RANGE

REGUPOL® SOLAR STANDARD

PHOTOVOLTAIC SYSTEM FOR FLAT ROOFS

- Regupol solar standard is a protective layer for flat roof waterproofing installed under photovoltaic and solar power systems on flat roofs.
- Regupol solar standard protects roofs from mechanical damage and thermal influences.
 - Extends the service life of roof waterproofing.
- Is individually designed and adapted to suit each individual mounting system.
 - Simple and efficient installation.
- Resistant to acids and alkalis as far as possible.
- Height compensating, water-permeable, temperature-resistant.
