

VEGETATION CONTROL RANGE - FIRE GRADE

REGUPOL® VEGETATION CONTROL 767 FIRE

PREVENTING UNWANTED VEGETATION EFFECTIVELY AND SUSTAINABLY

- Regupol Vegetation Control 767 Fire prevents unwanted vegetation by depriving it of UV light.
- The mats are water-permeable, which preserves microbial life and prevents erosion.
 - Eliminates the use of herbicides and the need for regular mowing.
 - With over 95% recycled content, this is a 'top recycling product'.
- Protects solar energy systems on flat green roofs from unwanted plant growth.
- Makes maintenance and servicing work under photovoltaic systems much easier.
- Prevents grass growth from causing production outages in solar energy systems.
 - The material is flame-retardant.
- Resistant to flying sparks and radiant heat in acc. with DIN CEN/TS 1187.
 - For inaccessible or sensitive areas.
