

Kitset Bridges

Fast, cost-effective bridge solution designed for DIY installation

Washed-out bridges can quickly cut off access and bring operations to a halt.

Our Kitset Bridges are designed to get you reconnected fast, without the cost and complexity of a traditional bridge build.

Lightweight, cost-effective, and built to last, they're ideal for farms, private properties, rural access, and anywhere you need to span a gap.

Constructed from durable galvanised steel and timber, they're engineered to meet NZTA Bridge Manual standards.

Standard Spans & Pricing

8m x 3.6m - **\$52k + GST**

9m x 3.6m - **\$57k + GST**

10.6m x 3.6m - **\$72k + GST**
