

## Technical Data Sheet

### Pyrosil Tape<sup>™</sup> / Pyrosil<sup>™</sup> Tape Reinforced

**Product Name:** Pyrosil<sup>™</sup> Tape

**Technical Description:** An iron oxide red silicone rubber tape with extreme elasticity. Self bonding, Pyrosil Tape cures itself within seconds. Product available with reinforced, sinusoidal-shaped glass fiber for increased tensile strength and resistance to notch sensitivity (PSTR).

**Temperature Capabilities:** Rated for 475°F (246°C) continuous exposure.

**Product Overview:** Pyrosil<sup>™</sup> Tape (PST) and Pyrosil<sup>™</sup> Tape Reinforced (PSTR) are designed to provide a self-fusing inorganic rubber insulator, and to be used in conjunction with Pyrojacket<sup>®</sup> and Pyrotape<sup>®</sup> as an end sealant to prevent moisture and hydraulic oils from wicking into the inner braid.

The self-bonding silicone offers excellent resistance to radiant heat, corrosive atmosphere, moisture, chemicals, vibration, and electricity.

Pyrosil<sup>™</sup> Tape makes a flexible, homogenous, coil insulation that is easily applied with one wrap of the tape forming a void-free system.

Pyrosil<sup>™</sup> Tape's excellent dielectric strength makes it suitable as an electrical insulator in a variety of applications.

Pyrosil<sup>™</sup> Tape is supplied in compliance with A-A-59163 : which supersedes MILI-46852C.

**Dimensional Data:** Pyrosil<sup>™</sup> Tape available in 1" (25mm) and 1-1/2" (38mm) wide rolls.

**Roll Length:** 36ft (11m).

Pyrosil<sup>™</sup> Tape Reinforced: Available in 1" (25mm) wide.

**Roll Length:** 60ft (18m).

**Disclaimer:** Due to the range of possible applications, no warranty is expressed or implied. ADL Insulflex, Inc.'s liability is limited solely to the replacement of defective material. ADL Insulflex, Inc. will not be held liable for any consequential damages arising from the use or misuse of the material. While the information given herein is believed to be reliable, ADL Insulflex, Inc. makes no warranties as to the accuracy or completeness. Samples of all Insulflex<sup>®</sup> products are available at no cost or obligation, and suitable trials should be made prior to installation.

## Technical Data Sheet

# Pyrosil Tape™ / Pyrosil™ Tape Reinforced

### Nominal Thickness:

Regular Pyrosil™ Tape 1" (25mm) wide = 0.020" (0.51mm)

1-1/2" (38.1mm) wide = 0.060" (1.52 mm)

### Reinforced Pyrosil™ Tape

1" (25mm) wide = 0.020" (0.51mm)

**Installation:** Stretch tape during installation using at least a 50% overlap. For best results, use on clean, dry surfaces free from dirt and oil.

**Cautionary Notes:** Not recommended for exposure to molten splash or flame.

**Disclaimer:** Due to the range of possible applications, no warranty is expressed or implied. ADL Insulflex, Inc.'s liability is limited solely to the replacement of defective material. ADL Insulflex, Inc. will not be held liable for any consequential damages arising from the use or misuse of the material. While the information given herein is believed to be reliable, ADL Insulflex, Inc. makes no warranties as to the accuracy or completeness. Samples of all Insulflex® products are available at no cost or obligation, and suitable trials should be made prior to installation.
