

SIMPLEX

Revolutionary panel fastener

NO MASKING REQUIRED

for the foaming process - thanks to protective skin technology

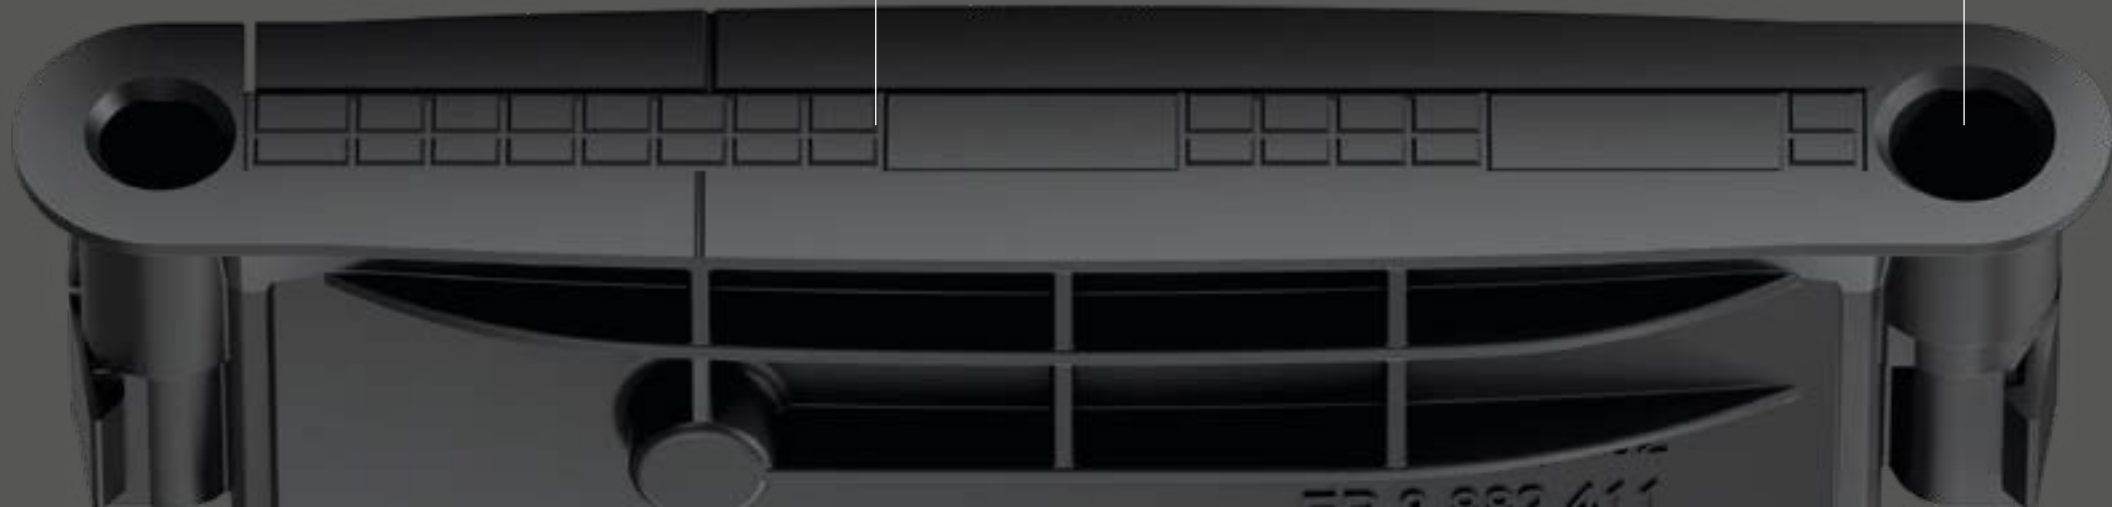

RELIABLE VENTILATION

ensures minimal air pockets during the foaming process - for best possible insulation values

Patented self-opening
protective skin technology

Filter chamber / bushing

COST SAVING

Faster installation and assembly for efficient and economical production processes

DURABLE

Corrosion-resistant and durable materials for sustainable operation

PATENTED TECHNOLOGIES

The self-opening protective skin technology and ventilation function are patented technologies

LOCKED IN ONE GO

The entire span of the Allen key, from insertion to the end position, is only a maximum of 180°. This means that there is no need to change grip during rotation.

EASY TO ASSEMBLE

SIMPLOX enables faster, easier, and more precise installation than ever before

TENSILE UP TO 2.500 N

force on the hook, equivalent to 250 kg (in the foamed state)
