ELECTRIC CHERRY TREE

Thank you for choosing to support the adoption of an electric cherry tree in our Central Otago orchard, where cherries are grown using zero fossil fuels. By supporting our orchard, you are joining us on our mission to improve farming practices for the betterment of our planet. You are now part of our farming family and can follow along as your cherries grow throughout the season. We are thrilled to have you join us on this journey and are excited about what the future holds.
