To our customers

5405 Baden-Daettwil, November 17, 2026

Declaration of Compliance with EU Sanctions Regulations

Syslogic AG, Switzerland (hereinafter referred to as "Syslogic"), hereby confirms its commitment to complying with all applicable sanctions regulations, including the relevant restrictive measures imposed by the European Union concerning Russia and Belarus.

In the context of its business relationships with customers, Syslogic makes the following declarations:

1 Corporate Ownership and Control

Syslogic confirms that:

- The company is incorporated and established in Switzerland and is not established in Russia or Belarus.
- The company is not directly or indirectly owned or controlled by persons or entities subject to applicable sanctions.
- The company does not act on behalf of or under the direction of any person or entity where such conduct would violate applicable sanctions regulations.
- The company is not designated under any applicable EU or Swiss sanctions lists.

2 Compliance with Sanctions Regulations

Syslogic confirms that it conducts its business activities in accordance with applicable Swiss sanctions legislation and, where applicable, European Union sanctions regulations, including Council Regulations (EU) No. 833/2014, (EC) No. 765/2006 and (EU) No. 269/2014, as amended.

Syslogic does not knowingly procure, manufacture, supply, transfer or deliver goods in violation of applicable sanctions or trade restrictions.

3 Supply Chain and Product Origin

Syslogic sources electronic components, assemblies and other materials through an international supply chain involving established manufacturers and suppliers.

Based on information reasonably available to Syslogic and appropriate risk-based due diligence, Syslogic is not aware of any circumstances indicating that the goods supplied are in violation of applicable sanctions against Russia or Belarus.

Due to the complexity and global nature of the electronics supply chain, Syslogic cannot independently verify or guarantee the complete origin, processing history, transit routes or historical ownership of every individual component, raw material or intermediate product throughout all upstream supply chain tiers.

Accordingly, this declaration does not constitute an unconditional guarantee regarding circumstances beyond Syslogic's reasonable knowledge, access to information or control.

4 Sanctioned Persons and Entities

To the best of its knowledge, based on information reasonably available and appropriate risk-based due diligence, Syslogic does not knowingly engage in transactions with sanctioned persons or entities, or with persons or entities owned or controlled by them, where such transactions are prohibited under applicable sanctions regulations.

This confirmation does not constitute a guarantee regarding unknown historical ownership or control relationships involving upstream suppliers or other third parties that cannot reasonably be verified by Syslogic.

5 Notification of Material Changes

Should Syslogic become aware of any material circumstances affecting the accuracy of this declaration or the sanctions compliance of goods supplied under an ongoing business relationship, Syslogic will inform the affected customers within a reasonable period, to the extent required by applicable law or contractual obligations.

Should Syslogic become aware of any material circumstances affecting the accuracy of this declaration or the sanctions compliance of the goods supplied, Syslogic will inform the affected customers without undue delay.

6 Scope of Declaration

This declaration is issued in good faith, based on the information available to Syslogic and the due diligence reasonably performed as of the date of signature.

It is intended to confirm Syslogic's commitment to sanctions compliance without creating additional contractual warranties or obligations beyond those required by applicable law or expressly agreed between the parties.

Nothing in this declaration shall limit or exclude any mandatory obligations arising under applicable sanctions legislation.
