

Sebastian Fermin

ABOUT

UX/UI Designer with experience designing digital products across SaaS, startups and web platforms. Over the last years I've shifted my focus toward Product Design, working in startup and SaaS environments where I've designed complex user flows, internal tools and user interfaces from discovery through delivery.

Looking to contribute to a mature product team where I can help build thoughtful user experiences while continuing to grow in research, product thinking and iterative product development.

WORK HISTORY

UX/UI Designer

Curbcut - Montreal, Canada
December 2024 to March 2026

Designed user experiences for a suite of data-intensive applications in a startup environment, collaborating with engineers and stakeholders to transform complex workflows into clear, usable interfaces.

- Designed end-to-end user flows for multiple internal products.
- Created wireframes, prototypes and high-fidelity interfaces in Figma.
- Collaborated closely with engineering to deliver production-ready designs.
- Worked across multiple products with evolving business requirements.

UX/UI Designer

Jiu Jitsu World League - California
February 2023 to March 2026

Designed digital experiences for a high-traffic sports platform, improving navigation, trust and clarity across registration and event management journeys.

- Simplified complex registration flows.
- Redesigned information architecture.
- Improved usability across mobile and desktop.
- Worked directly with founders and developers.

Lead Web Designer

La Resistance Agency - Ottawa, Canada
May 2021 to October 2024

Designed websites and digital experiences from discovery to delivery, translating business goals and user needs into responsive interfaces.

Senior Designer

Blacknosaur - Madrid, Spain
February 2019 to September 2021

Led visual design projects while establishing scalable design patterns, mentoring junior designers and improving consistency across multiple digital products.
