

SAFE BY DESIGN.

Securing spaces and elevating play.

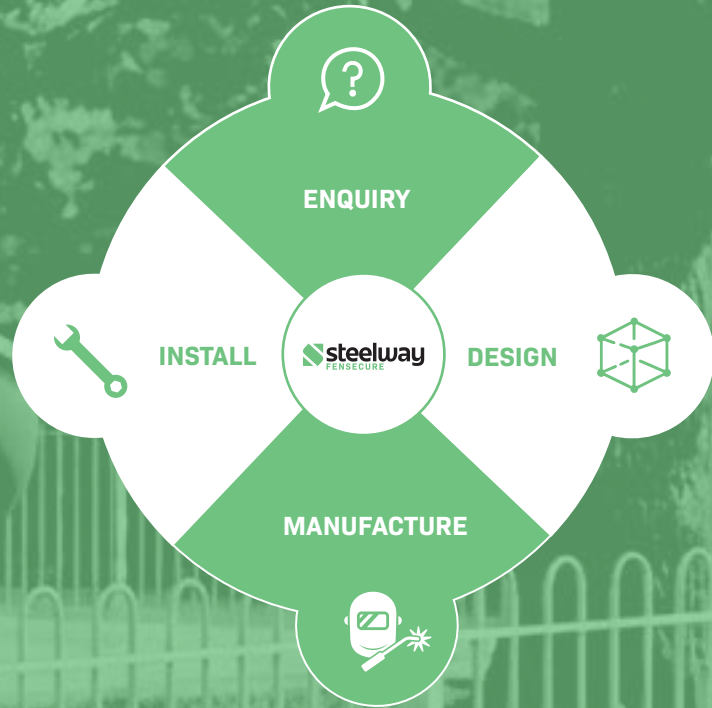

steelway
FENSECURE

C-St-V1-Ap26

Introduction: Securing Every Space

At Steelway Fensecure we design and manufacture high-performance steel fencing for security, style and durability.

At the heart of our work is a commitment to engineering excellence and long-lasting protection. Our steel fencing solutions are built to meet the demands of modern environments: whether securing industrial facilities, enhancing commercial properties or elevating residential spaces,

Technical Support

We provide dedicated technical support to ensure **smooth project execution** and quick issue resolution.

Stock Availability

We ensure **reliable stock availability** through efficient inventory management and prompt restocking.

Quality Assurance

We guarantee **top-quality steelwork** through strict inspections and precision craftsmanship.

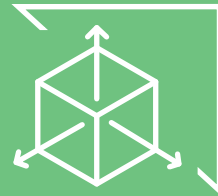

Customer Care

We deliver responsive customer care focused on **clear communication** and lasting client satisfaction.

UK Manufactured

We proudly manufacture all our products in the UK, ensuring superior **quality and local craftsmanship**.

Made To Measure

We offer **made-to-measure solutions** tailored precisely to each client's specifications.

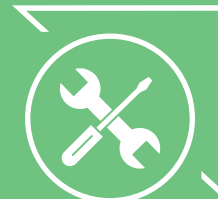

Fast Delivery

We provide **fast, reliable delivery** to keep your projects on schedule.

Group Solutions

We deliver group solutions through Northern Industries' combined **expertise and capabilities**.

Maintenance Packages

Expert steel maintenance and services, for safe access and lasting performance.

Our Guiding Principles

Our Vision:

Our vision is to be the trusted leader in steel fencing, known for **engineering excellence, innovative design** and **reliable security**: delivering solutions that protect and enhance environments of every kind.

Our Values:

We are committed to **engineering excellence**, delivering high-quality steel fencing designed for strength, durability and long-term security. **We combine purposeful design with practical performance** to protect and enhance every space, while working closely with our customers to meet their needs.

Through quality, reliability and integrity, we build trust that lasts.

About:

We design and manufacture high-performance steel fencing that delivers security, durability and modern design for a wide range of environments.

Our approach is built on precision manufacturing and expert engineering, enabling us to create tailored solutions for every project. Using high-quality materials and advanced processes, our fencing is built to withstand demanding conditions while providing long-lasting, reliable protection.

Free Site Survey

We offer a free site survey to ensure that every project is tailored specifically to your needs.

Assistance

We offer assistance with design and planning to streamline your project from start to finish.

Project Management

We provide dedicated project management to ensure every stage runs smoothly and efficiently.

Installation

We offer expert installation services to ensure every project is completed safely, efficiently and to the highest standard.

Maintenance

We provide maintenance services to keep your installations performing safely and effectively long term.

Our Credentials: Built On Integrity

Steelway Fensecure is proud to have a range of recognised industry accreditations that **demonstrate our commitment to quality, safety and excellence** across all areas of our work.

UL Listed (EU)

Recognised assurance of quality, safety and performance.

Product is independently tested and certified to meet European Safety Standards.

CE Marking

Compliant with recognised health and safety standards.

Construction Product Regulations - EN1090 for CE Marking, Structural Components: EXC3.

GHQ Approval

Meeting high standards in health & safety management.

Officially authorised and meets the required standards set by the General Health Headquarters.

ISO 9001: 2015 Certified

Meeting internationally recognised standards for consistent quality management.

ISO 9001 - Quality Management System

Certification Body: BSI. Approval No: FM10004.

ISO 14001 - Environmental Management System

Certification Body: BSI. Approval No: EMS67731.

OHSAS 18001 - Health & Safety Management

Certification Body: BSI. Approval No: OHS89170 (Bilston Road).

CHAS Accredited

Recognised assurance in health and safety compliance standards.

CHAS - Registration 00043658.

SafeContractor

Recognised assurance of safe and responsible business practices.

Safe Contractor - Registration N00186281.

Construction Skills Certification Scheme

Recognised verification of workforce competence and qualifications.

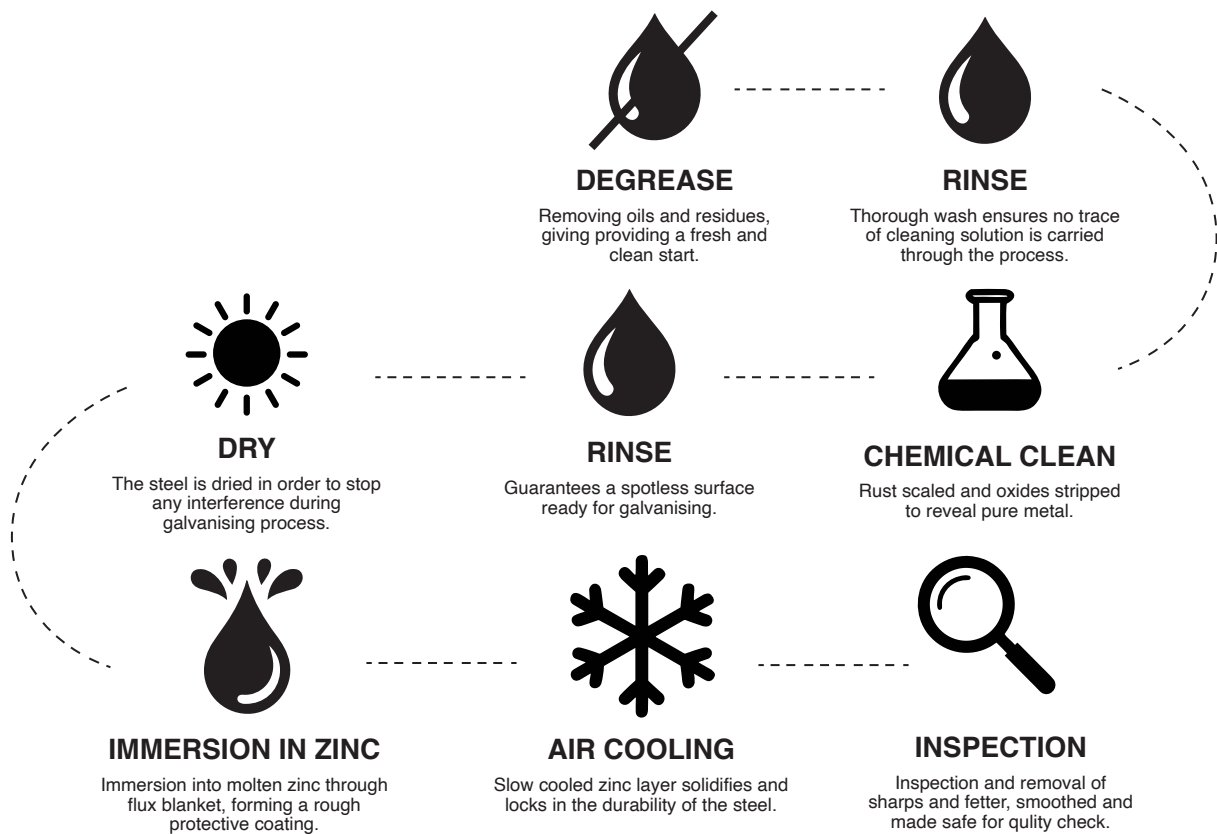

UKAS Management Systems

Recognised certification of compliant and effective management systems.

Management system is certified by the United Kingdom Accreditation Service to meet recognised quality standards.

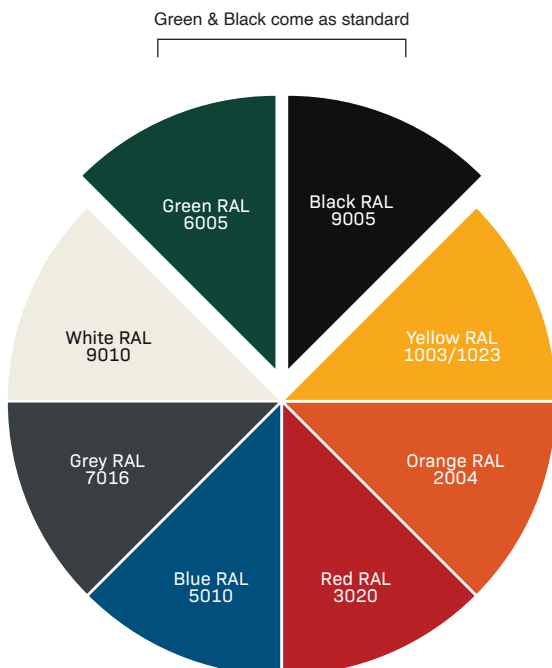

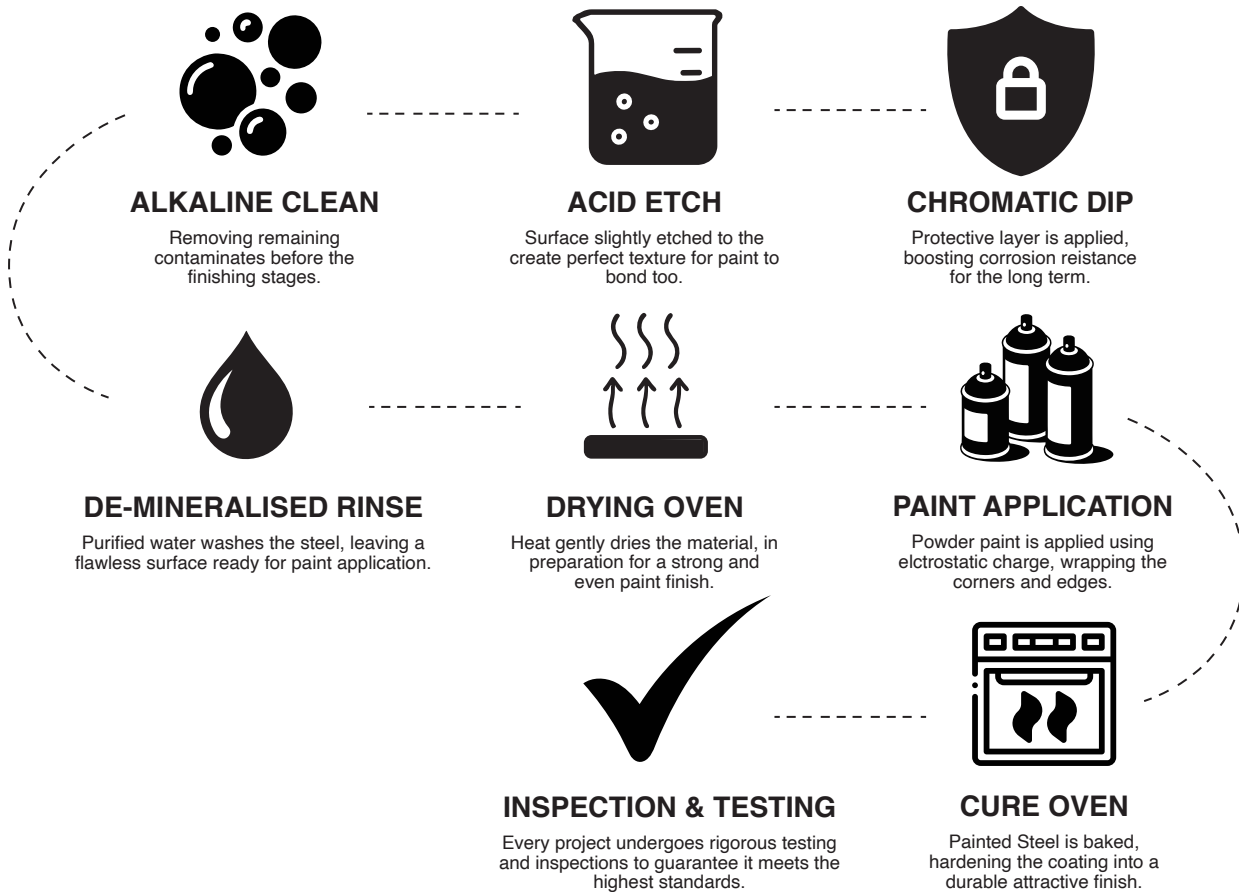

Galvanizing: Our Galvanizing Process

Steel galvanizing provides a proven, high-performance solution for corrosion protection, extending the lifespan of steel in demanding environments. It is the industry standard for applications where durability, reliability and low maintenance are essential.

Through a controlled process and surface preparation and hot-dip coating in molten zinc, a bonded protective layer is formed, delivering exceptional resistance to corrosion, impact and weathering. Ideal for fencing, infrastructure and exposed external applications, galvanised steel offers long-term performance, reduced lifecycle costs and dependable protection in even the harshest conditions.

Powder Coating: Our Powder Coating Process

Colour Options: RAL Colours

RAL colour finished provide a durable, high-quality coating enhancing appearance and protection.

Black and green are available as standard on most systems, with additional RAL colours offered to suit specific project requirements at an extra cost.

Key Features:

- ▶ Superior Corrosion Resistance
- ▶ Low-Maintenance Longevity
- ▶ Custom Aesthetic Finishes
- ▶ Perfect Integration

Fensecure: Service Overview

We offer a complete range of steel fencing and gate solutions, combining security, durability and style to meet the needs of industrial, commercial and residential environments.

Our core products include bow top, ball top palisade and mesh fencing solutions, along with matching gates, while also providing a variety of additional solutions to suit specific project requirements. Every enquiry is accompanied by a detailed custom drawing and our bespoke design service ensures each installation is tailored for a perfect fit, delivering long-lasting protection, reliable performance and a professional finish.

Mesh Fencing

With a mesh design, mesh fencing is commonly found around play areas, as well as commercial and industrial sites, providing security, durability and visibility.

Mesh Gates

Mesh gates are commonly used for play areas, as well as commercial and industrial sites, providing secure, durable access while maintaining visibility.

Palisade Fencing

With a pointed top-design, palisade fencing is commonly used around industrial sites, schools and high-security areas, providing strong, durable protection and a deterrent to climbing.

Ball Top Gates

With rounded tops, ball-top gates provide secure and durable access to homes, gardens and properties while complementing the look of matching fencing.

Palisade Gates

With a pointed-top design, palisade gates provide secure and durable access to industrial sites, schools and high-security areas while complementing matching fencing.

Bow Top Gates

With arched tops, bow-top gates provide secure and durable access to homes, playgrounds and properties while complementing the look of matching fencing.

Bow Top Fencing

With arched tops, bow-top fencing is often used around homes, parks and gardens to provide security, durability and an attractive, decorative appearance.

Ball Top Fencing

With rounded tops, ball-top fencing is often used around homes, gardens and properties to provide security, durability and an attractive, finished appearance.

Fencing: Specification Guide

Our fencing range is designed to offer a versatile balance of strength, safety, and visual appeal, providing reliable solutions for a wide variety of environments and applications.

From decorative boundaries to high-performance security and public safety solutions, each option within the range has been developed with both functionality and aesthetics in mind. The collection accommodates different project requirements through a considered combination of durable materials, adaptable configurations, and consistent design quality. Whether the priority is enhancing visual character, ensuring protection or meeting practical site demands, the range delivers dependable performance while maintaining a cohesive and professional finish across all installations.

The accompanying grid provides a clear overview of key specifications, enabling quick comparison and helping guide product selection based on project requirements.

Style	Primary Application	Heights (mm)	Bay Width (mm)	Post Size	Rails	Infill	Centres	Page
Balltop	Decorative Boundary	900-2100	2820	40x40 - 70x70	30x8 - 50x10	12-16mm bar / 19-22mm tube	112-122	13
Bowtop	Traditional Safety	900-2100	2820	40x40 - 70x70	30x8 - 50x10	12-16mm bar / 19-22mm tube	112-122	11
Vertical Bar	Commercial Security	900-2100	2820	40x40 - 70x70	30x8 - 50x10	12-16mm bar / 19-22mm tube	112-122	14
Childsafe	School & Playground	1000, 1200	2758	50x50	30x10	12mm bar	101	12
Estate Railing	Rural & Parklands	900-1200	2000	40x80 flat	-	19mm tube, 20mm bar, 25x6 flat	-	15
Guardrail	Pedestrian Safety	1000	2000	50x25	-	12mm bar	109	16

Railings: Bow Top Railings

Our bow-top railings with 2820mm post centres, are perfect for enhancing the appearance and security of homes, gardens and public spaces.

These railings feature **versatile design options** including **raked and radius panels**, **cranked posts** and **base plated** posts for added stability. Post finials add a decorative touch, while bespoke designs are available to suit specific site requirements or aesthetic preferences. Their robust construction and thoughtful detailings make our bow top railings **both functional and visually appealing**.

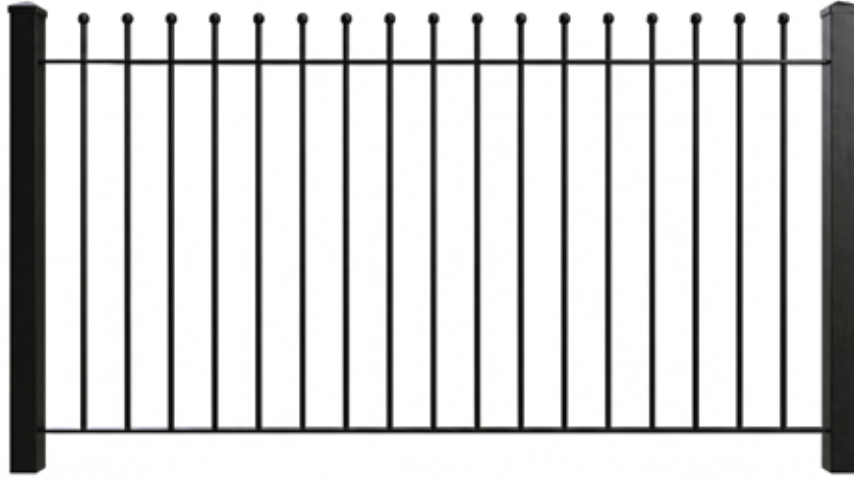

Gates: Bow Top Gates

Bow top gates provide secure and durable access with 2820mm post centres,.

Designed to compliment bow top railings, they feature raked and radius panels, cranked and base-plated posts, decorative finials and can be tailored with bespoke designs for a perfect fit.

Railings: Ball Top Railings

Ball top railings provide a classic and durable fencing solution with 2820mm post centres ideal for enhancing the safety and appearance of homes, gardens and public spaces.

Available with 25mm and 30mm ball standards, these railings offer a range of design features, including raked and radius panels, cranked and base plated posts and decorative finials. Bespoke options are also available to suit unique site requirements, combining sturdy construction with an elegant, finished look that complements any property.

Gates: Ball Top Gates

Ball top gates provide a secure, stylish entrance that compliments ball-top railings and enhances any property.

Designed for durability and long-lasting performance, these gates provide reliable access and can be customised with bespoke designs to suit specific site requirements, combining functionality with a polished, finished appearance.

Railings: Pedestrian Guard Railings

PG1 Pedestrian Guard Rails:

Individual Pole Placement

With Sight Top:

Providing a safe, visible barrier for pedestrians.

Durable and robust, it improves visibility while offering reliable pedestrian protection in urban and public places.

Without Sight Top:

Providing a durable barrier for pedestrian areas.

Durable and robust, it provides reliable pedestrian protection while clearly defining walkways in urban and public spaces..

PG2 Pedestrian Guard Rails:

Individual Pole Placement

With Sight Top:

Providing a strong, highly visible barrier for pedestrian areas.

Durable and robust, it offers reliable protection while the sight top improves visibility, helping to clearly define walkways in urban, commercial and public spaces.

Without Sight Top:

Providing a strong, durable barrier for pedestrian areas.

Robust and long lasting, it offers reliable protection while clearly defining walkways in urban, commercial and public spaces.

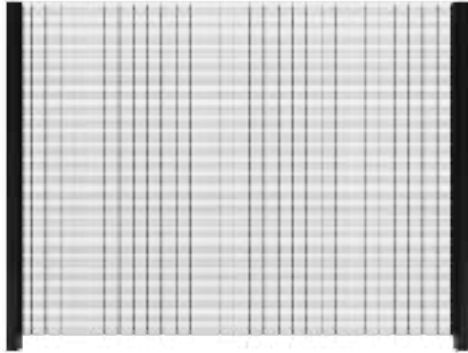

Visirail:

Featuring **high-visibility panels** and a robust construction, it guides pedestrian safely while **offering reliable protection** in busy urban and public areas.

Our Products: Mesh Systems & Gates

358 Prison Mesh:

358 steel security fencing featuring 2500mm post centres.

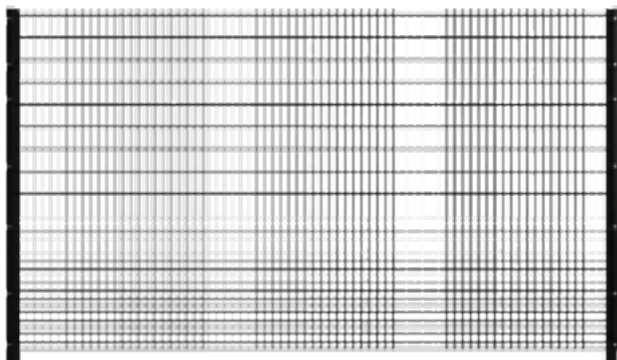

This anti-climb and anti-cut barrier uses 2500mm spacing to maintain structural rigidity and panel alignment in high-security settings.

868 Twin Wire Mesh:

868 twin wire mesh with 2500mm post centres.

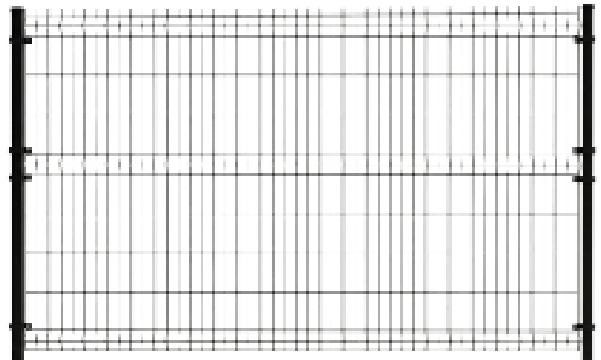

This system uses dual 8mm horizontal wires and 6mm vertical wires for high impact resistance. The 2500mm spacing provides a stable, rigid framework for the reinforced panels.

Rebound Mesh:

Steel rebound mesh with 2500mm post centres.

This fencing features reinforced lower wires designed to withstand repeated ball impacts and maintain shape. The 2500mm spacing ensures the steel framework remains rigid and aligned under high-use conditions.

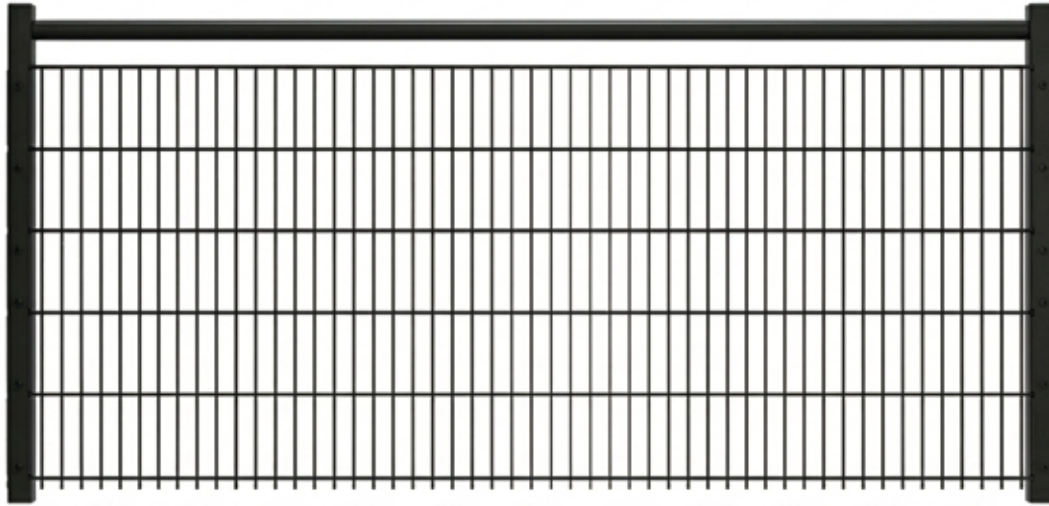

V-Mesh Fencing:

V-Mesh steel fencing with 3000mm post centres.

This profile includes pressed "V" folds for increased lateral rigidity across panels. The 3000mm spacing offers a cost-effective installation by reducing the total number of posts required while maintaining secure alignment.

Railings: Spectator Railings

Heavy-duty steel spectator railing featuring 2500mm post centres, designed for crowd control and perimeter demarcation at sporting venues.

This railing system provides a robust physical barrier between spectators and the field of play, utilizing a tubular steel top rail for safety and visibility. The 2500mm post centres ensure high structural integrity and consistent alignment, creating a durable framework capable of withstanding the pressure of large crowds while maintaining a clean, professional appearance.

Our Products: Clip & Clamp Systems

Heavy-duty clip and clamp steel system for securely connecting mesh panels in a range of fencing applications.

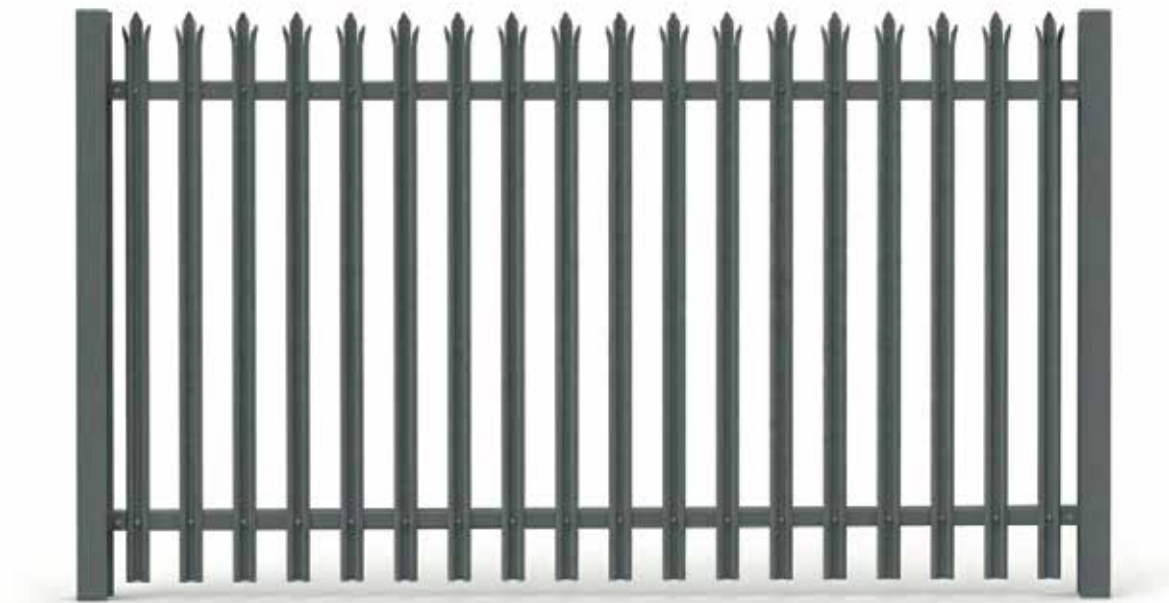

Engineered for strength and ease of installation, this system provides a reliable method of joining mesh sections, ensuring a stable and consistent framework.

Including bespoke options and specifications, please visit our website: steelwayfensecure.co.uk

18 | Fensecure II Spectator / Clip & Clamp

Railings: Palisade

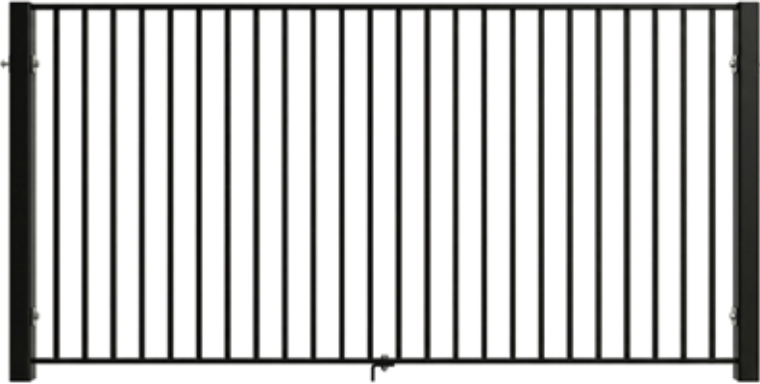

Heavy-duty steel palisade fencing and gate systems, designed to provide high-security perimeter protection for sports grounds, commercial sites and public spaces.

Constructed for strength and durability, this system forms a formidable physical barrier with a range of pale options to suit different security requirements. Configurations include 'W' section triple point and 'D' pale profiles with 2750mm post centres, as well as round and notched variations, all engineered for consistent alignment and structural integrity. Built to withstand impact and deter unauthorised access, it delivers a secure, long lasting solution with a professional finish.

<p>Pale Tops</p>	 <p>Triple Pointed</p>	 <p>Round Top & Notched</p>	 <p>Single Point</p>	 <p>Round Top</p>
<p>Pale Profiles</p>	 <p>D Pale (2750mm post centres)</p>		 <p>W Pale (2750mm post centres)</p>	

Railings: Flat Top Railings

Heavy-duty steel flat top railing system, purpose built for durability and clean visual integration in sports grounds and public venues.

Constructed with a flat top rail, this system provides a strong, low-profile barrier with a clean finish. Evenly spaced posts ensure stability and alignment, delivering a robust solution suited to regular use and crowd pressure.

The Group: Capabilities

18

Installation Teams

Our experienced installation teams ensure safe, efficient project delivery.

6

Factories

Our six factories provide the capacity and capability to deliver high-quality steel solutions at scale.

284, 800sq ft

Total Factory Size

Our combined 284,800 sq ft of factory space enables high-capacity, efficient steel fabrication.

24

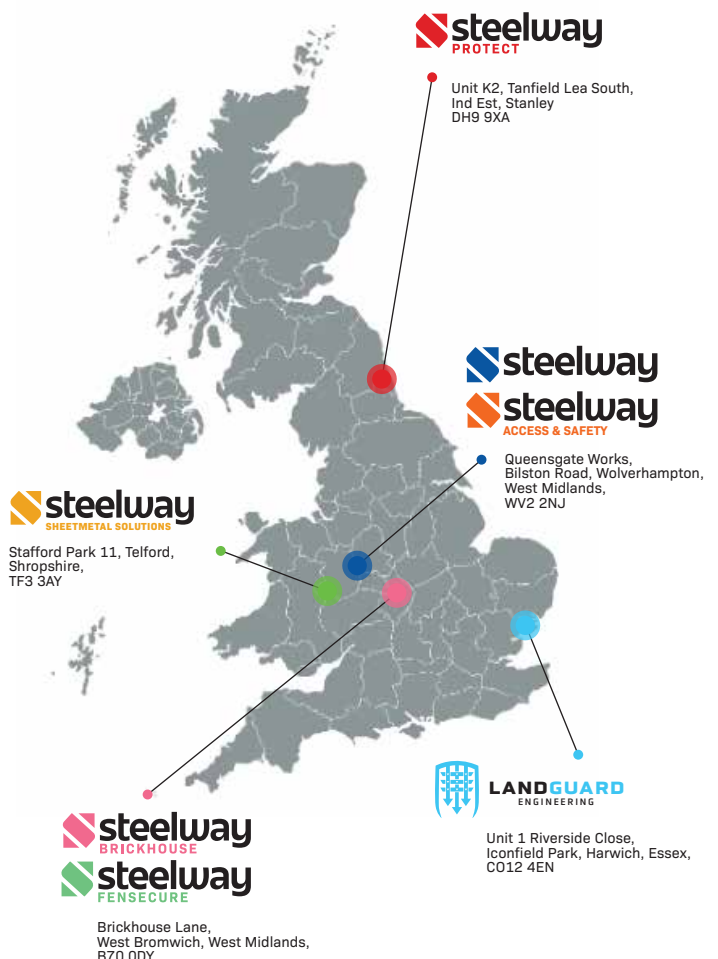

Vehicles

Our vehicle fleet supports efficient nationwide delivery and installation.

20

Design Engineers

Our team of 20 design engineers delivers innovative, precise steel solutions.

The Group: Company Capabilities

Steelway
www.steelway.co.uk
Designs and manufactures custom steel structures and security solutions.

Fensecure
www.steelwayfensecure.co.uk
Manufactures durable steel fencing, gates, and MUGA systems.

Brickhouse
www.steelwaybrickhouse.co.uk
Builds high-quality steel access covers and frames for utilities, commercial and industrial sectors.

Protect
www.steelwayprotect.co.uk
Provides high-security steel access covers, doors, and enclosures.

Sheetmetal Solutions
Provides high-quality steel access, safety, and air ventilation solutions.

Access & Safety
www.steelwaypaccessandsafety.co.uk
Provides high-quality steel access, safety, and air ventilation solutions.

Northern Industries

Our Contributions: Sustainability & Compliance

Sustainability is central to our manufacturing approach, through responsible production practices, we reduce environmental impact while delivering high quality, compliant products built for longevity.

All products are designed with sustainability in mind, prioritising durability to extend lifecycles and minimise waste. By focusing on considered material selection, efficient processes and strict adherence to industry standards, we support a more environmentally responsible metal fabrication sector while helping customers achieve their own sustainability goals.

Green Steel Alternatives:

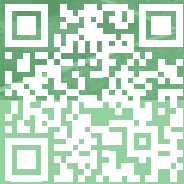

Green steel is a sustainable, low emission alternative that maintains strength and durability.

Made from recycled, low-emission steel, it meets sustainability goals and is available in various grades and sizes for flexible construction solutions.
