

DROP-IN DAYS

Tuesdays 10am to 2pm

Oberon Library &
Community Centre

Project update

- TagEnergy's quarterly update to Oberon Council in September included an overview of the waste management process during the construction phase of a wind farm project (see update [HERE](#)).
- We will publish a revised wind turbine layout in late 2026, including proposed wind turbines in both State forests and some adjacent freehold land.
- The proposed maximum tip height for wind turbines is now 275m, reduced from 300m.
- A Scoping Report, including the revised wind turbine layout will be submitted to the NSW Department Planning Housing and Infrastructure in late 2026.
- The transport route for the delivery of wind turbine components will be announced in late 2026.
- Successful applicants from Round 5 of our Early Sponsorship Program will be announced during October.
- The Community Hub Development Application was approved in September, and we expect the Hub to open in late October. Until then, drop into Oberon Library on Tuesdays to meet the team, ask questions, chat about the project or lodge your \$100 Electricity Bill Credit application.

STROMLO ENERGY

TagEnergy and Stromlo Energy respectfully acknowledge the Traditional Owners of the land on which The Pines Wind Farm project and our offices are located. We acknowledge and uphold the continuing connection of Traditional Owners to the land and pay our respects to Elders past and present.

Community sponsorship - scoring goals and sanding floors

The Pines Wind Farm was pleased to sponsor the Oberon Netball Club in 2026. Congratulations to all the players, coaches and managers on a great season.

Burruga District Community Association was also a previous recipient of our Early Sponsorship Program, with funding used to purchase an area of new timber flooring for Burruga Hall. Local volunteers then got to work installing, sanding and varnishing the new boards. The results speak for themselves!

Is your organisation seeking funding for a project?
Round 6 of the program closes on 28 February 2027.

Your organisation may be eligible for \$1,000 to \$5,000 in funding. See our Early Sponsorship Program guidelines and application form [HERE](#).

Legacy Project Committee - expressions of interest

The Pines Wind Farm's \$5 million Legacy Project Fund would see a major community project, or projects, delivered in the region. The fund is dedicated to delivering community initiatives that will leave a lasting impact on the communities of Black Springs, Burruga, Oberon, and Trunkey Creek.

A Legacy Project Committee is being established and will play a central role in shaping the investment of the \$5 million Legacy Project Fund across the region.

- **Are you a community representative from the Oberon or Bathurst Regional Local Government Area?**
- **Would you like to help ensure that the ideas, needs, and long-term aspirations of local people guide this investment to deliver the greatest benefit?**

Please lodge your Expression of Interest to join the Legacy Project Committee [HERE](#).

Don't forget to submit your application for a \$100 credit on your electricity bill

You can bring your electricity bill to the Oberon Library on Tuesdays 10am to 2pm to submit your application

Every household in the Oberon Local Government Area, and the suburbs of Triangle Flat, Bald Ridge, Abercrombie River, Trunkey Creek, Arkell, Hobbys Yards, Caloola and Rockley is eligible for a \$100 electricity bill credit per year from now until construction.

The program will increase to \$250 per year plus CPI from construction for the life of the project.

You can apply via our website: [HERE](#) or email your electricity bill to:

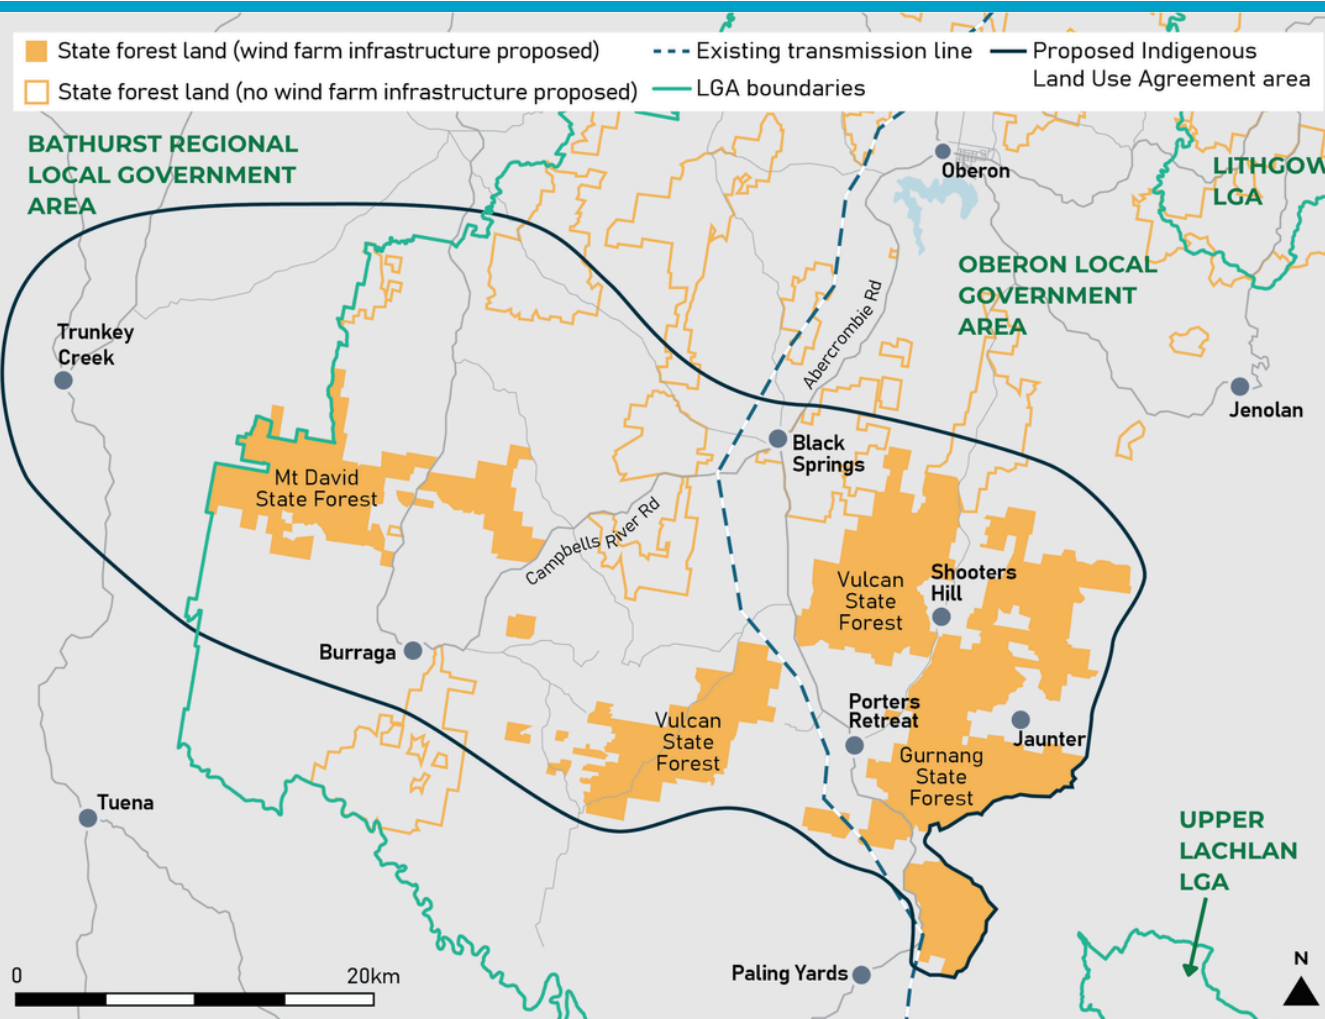

billpay@thepineswindfarm.com.au

Native Title and proposed Indigenous Land Use Agreement

In Australia, native title is the recognition that Aboriginal and Torres Strait Islander peoples hold traditional rights and interests in land and waters. The High Court's 1992 Mabo Decision recognised the pre-colonial land rights of Aboriginal and Torres Strait Islander peoples. The Mabo Decision resulted in the Commonwealth *Native Title Act 1993*.

TagEnergy is seeking persons who may hold native title regarding a proposed Indigenous Land Use Agreement (ILUA) for The Pines Wind Farm. An ILUA is a voluntary agreement between a native title group and other stakeholders which provides consent to carry out agreed activities.

The proposed ILUA area for The Pines Wind Farm is illustrated below. The proposed ILUA pertains to State forest land, Crown land and any other land where native title may not have been extinguished.

The proposed ILUA area is broader than the current wind farm site. It includes land that may be relevant to other aspects of the project, such as transport routes and associated infrastructure.

The broader ILUA area does not mean that wind turbines are proposed across the entire area.

Native title compliance and identification of native title parties

TagEnergy proposes to negotiate one or more ILUAs to achieve native title compliance for the project. As there is no registered native title claim over The Pines Wind Farm site, TagEnergy is undertaking a process to identify all people who hold or may hold native title in the proposed ILUA area.

If you hold or may hold native title in the proposed ILUA area, please contact us by 30 October 2026 to advise your interests.
