

HEALTH ADVISORY INTERNSHIP (Full-time Health Junior Advisor) – Spring 2026

Curious about what the future of health could look like - and want to be a part of shaping it? At the **Copenhagen Institute for Futures Studies (CIFS)**, you can turn that curiosity into hands-on experience. As a **Health Junior Advisor**, you will move beyond theory and work directly with real health projects tackling complex societal challenges.

You will explore emerging trends, help build future scenarios, contribute to workshops and research, and collaborate with people who are actively working to make health systems more innovative and equitable.

If you are motivated by big questions, real responsibility, and learning by doing, this is a place where you can test your ideas and see how foresight translates into action.

The Copenhagen Institute for Futures Studies is seeking a full-time **Health Junior Advisor from August 24th, 2026, to December 2026**. The deadline for applications is **15th of April, 2026**. Note: Applicants must have the legal right to live and work in Denmark / EU.

ABOUT CIFS

CIFS is an independent, non-profit futures think tank. Our **health team is multidisciplinary, working across public and personalised health to apply accessible data to policy and practice, empower citizens, and build ecosystems of collaboration**. We aim to improve healthcare by leveraging our foresight capabilities to equip and inspire individuals, organisations, and decision-makers to act on the future today.

In addition to driving the transition toward more sustainable healthcare systems, we **publish foresight-driven reports and magazines with leading health partners, host talks, workshops and courses and create joint initiatives** that bring together diverse stakeholders to shape future-ready solutions.

MAIN ASSIGNMENTS

Your main assignments will be to:

- Conduct research and analysis in the field of health
- Produce insights, results, and recommendations for clients
- Develop presentation material for workshops and presentations
- Assist in the facilitation of workshops including administrative tasks
- Support the health team with a wide variety of ad-hoc tasks

WHAT WE OFFER

As our new Health Junior Advisor, you will work closely with our health team as part of a **diverse, international, and multidisciplinary group**, engaged in an exciting and varied project portfolio. You will have the opportunity to apply your skills across **national, regional, and global projects** involving public, private, and civil society stakeholders.

You will also have the chance to publish your own articles on future-related topics through our **FARSIGHT** platform. This internship is a unique opportunity to explore the future of health with us and our partners, while gaining insight into our methodologies and advisory practice. *Please note: This internship is ON-SITE (Copenhagen, Denmark). Current students are preferred. It is possible to earn ECTS credits as part of the internship.*

WHAT YOU OFFER

We expect you to be a recently graduated bachelor's or a current master's-level student with a relevant academic background. We value diverse backgrounds and personalities. In addition, you bring:

- A high level of personal drive and ambition
- A creative, analytical, and versatile mindset
- The ability to navigate complex issues and a desire to exceed client expectations
- A positive attitude and good sense of humour to fit into our workplace culture
- A good eye for visuals, creative mindset, or a passion to make things “nicer”
- Fluency in English, spoken and written (Danish and/or other languages are a plus)
- A health-related degree (life sciences, public/global health, health policy, psychology, etc.) can be an advantage, but most important is **a strong interest in health-related topics and futures thinking**
- Student status (preferred, due to ECTS eligibility)

HOW TO APPLY

To apply, please send your resume and a cover letter explaining why you are the right candidate for the position and other relevant documents to internship@cifs.dk with “Health Junior Advisor Internship” in the subject line.
