

Quick Start Guide for MSP Series “NEMA Boxes”

1. Read the User manual before getting started.
2. Plug in Battery cables and Can bus connection to battery.
3. Turn battery on.

The battery has a boat switch that needs to be turned on during use.

5. Set power unit switch to “PV”. When in PV mode, the system automatically prioritizes solar charging and switches to AC if solar power is unavailable.

6. Connect AC power if available. (see User Manual)
AC input switch must be on for grid input!

AC Input Switch: Press at 'O' to turn off grid input, press at 'I' to turn on grid input (shown in the on state in the illustration).

4. Plug in solar panel using connections located at bottom of box.

7. Connect all accessories (See user Manual)
8. Connect to the MSP through the Victron control app.
