

Quick Start Guide for MST Series “MST-450”

1. Point the solar panel SOUTH to get the best overall sun input.
2. **Extend outriggers** and level trailer for stability when raising the mask.

3. **Turn on the battery** (push button on battery will turn green when on)

4. **Turn on the Breakers** to feed power to any devices in the top box. Turn on strobe lights if needed. Down=OFF Up=ON

5. **Set the timer** to manual to enable strobe lights. Timer can be set to run lights on a schedule

6. **Raise the mast** -Crank Clockwise/counterclockwise to raise/lower. Insert pin when mast is fully raised.

7. **Tilt panel** to desired angle based on your location. Lay flat when traveling.

8. **Plug in AC 110V** to charge battery if available
