*30 October 2009

The Forager Australian Shares Fund's unit price increased 5.3% in July. The Small Ordinaries Accumulation Index fell 3.2% while the larger cap All Ordinaries Accumulation Index rose 1.7%.

July was a strong month for Fund returns as businesses delivered updates on operating and corporate performance.

Enterprise software provider **Bravura** (ASX:BVS) upgraded earnings for the 2026 financial year, challenging the idea that all software businesses are under threat from AI. The business lifted management's preferred measure of cash profit to about \$77m, up from the prior \$69m to \$73m range. Better margins came mostly from continued cost discipline.

The business is showing that the better software incumbents can still grow margins and generate plenty of cash.

Meanwhile, foreign exchange provider **OFX** (ASX:OFX) has delivered its strategic review with a credible result despite a continuing run of mediocre operating performance: UK-based Equals Group has agreed an all-cash proposal at \$1.00 per share, a 108% premium to the price before deal announcement. The deal will take some time to consummate, with Equals needing to confirm debt funding and both businesses working on regulatory license approvals.

Another strategic review, this time at skydive and adventure group **Experience Co** (ASX:EXP), has produced a potential fix for the underperforming Skydive Australia business.

Inflite, a New Zealand aviation-tourism business has offered to purchase Experience Co's Australasian skydive operations. The deal is worth about \$65m: \$41m cash now, \$5m cash later and a 32.5% stake in the combined entity. This would be a good result but is not guaranteed, with due diligence, approvals and binding documents still required.

About Forager

With over 2,000 long-term investors and a focus on investing for the long-run, Forager Funds is a unique Australian asset management company. Following a strong 15-year track record, Forager is a sustainable business but is nimble enough to invest in smaller listed companies not accessible to many investment managers.

The company is majority owned by staff. Forager's shareholders support the desire to place performance before revenue. That means capping the size of funds before too much money becomes an impediment to performance. Key investment staff are strongly aligned with investors through co-investment and / or equity in the Forager business.

Fund Characteristics

- Concentrated portfolio of ASX-listed stocks
- Long track record in identifying unloved gems
- Restricted fund size allows investment in smaller businesses
- Strong focus on managing portfolio risks
- Daily applications and redemptions
