REGOLOGY

REGULATORY RESEARCH AGENT

Accelerate Your Regulatory Research with Agentic AI

No more getting buried in legalese or chasing scattered regulations. With the Regulatory Research Agent, you can automate the time-consuming work of parsing dense legal texts, cross-referencing jurisdictions, and determining what actually applies—so compliance doesn't stall and risks don't go unnoticed. Powered by both agentic and generative AI, the Research Agent taps into the largest global database to analyze laws and regulations in one place, digest complex legal language, and surface exactly what matters.

Jurisdictional Research

Identify Applicability

Summarize

Explore Content

Streamline Your Research

Find relevant laws faster and eliminate research bottlenecks.

✓ Search Quickly & Effectively

Use specialized filters and tags to target exactly the laws, regulations, and guidance you need. Narrow down results by jurisdiction, industry, topic, or agency so you spend less time on noise and more time on impactful work.

✓ Digest Complex Laws

Reggi, your built-in AI research assistant, transforms dense legal text into clear, plain-language summaries. It distills complex requirements into concise, accurate explanations, helping you extract obligations, exemptions, and penalties without getting lost in jargon.

✓ Find What's Applicable

Know which rules apply to your organization. The Research Agent identifies relevant requirements for your business — based on geography, industry, and type of operations — surfacing what matters most and flagging any gaps.

Stay Ahead of Regulatory Developments

Monitor changes across jurisdictions before they impact your business.

MULTI-JURISDICTIONAL RESEARCH

Compare regulations side-by-side across all relevant geographies. Reggi enables cross-jurisdictional comparisons, allowing you to ask questions across US federal, all 50 states, and countries globally and receive unified answers.

AUDITABLE RESEARCH TRAIL

Build a clear audit trail of your findings. Document why you, as the expert, choose to accept AI's proposed results. Every answer from Reggi includes citations and source links, so you can verify conclusions with authoritative sources and support your analysis.

Turn Research into Results

Extract insights, create drafts, and connect legal findings.

Summaries & Extraction

Found the relevant laws and regulations? Use Reggi to summarize them and extract key requirements tailored to your products, services, or operational context, so you can move straight to drafting updates or validating compliance.

First Drafts

Reggi also helps you generate well-structured initial drafts of requirements, policies, and controls, accelerating the handoff from legal analysis to compliance implementation.

Connect Insights to Action

Our Research Agent connects the dots between proposed bills, enacted laws, and resulting regulations across jurisdictions. It helps your team trace regulatory origins and feed structured insights into compliance workflows — from impact analysis to implementation.

Ready to Transform Your Regulatory Compliance?

Join the leading organizations that choose Regology for more streamlined, proactive, and informed regulatory compliance processes powered by AI Agents.
