REGOLOGY

Embrace the Future of Regulatory Compliance

Regology's AI-powered platform transforms regulatory compliance from mostly manual to automated. Our purpose-built AI agents track global regulations, instantly interpret updates, and map changes to your obligations. With simplified impact assessments and automated workflows, Regology keeps your compliance program agile, efficient, and always audit-ready.

AUTOMATE

Use AI agents to automate regulatory change updates and management.

ANTICIPATE

Stay ahead of change that applies to your jurisdictions and business profile.

ACT

Operationalize change with mapped requirements, risks, policies, and controls.

Manage the Full Cycle of Regulatory Compliance

Regulatory Change Agent

Built around your business and legal profile, this agent filters and prioritizes regulatory changes by jurisdiction, product, and impact.

AI handles relevance scoring, impact analysis, and task triggers, so your team never misses a critical update

Compliance Agent

Drives implementation of regulatory changes through automated workflows for controls, policies, and procedures.

AI supports obligation mapping, drafting, and task routing to accelerate compliant execution across teams.

Regulatory Research Agent

Powered by Reggi, this agent delivers fast, AI-driven legal research and applicability analysis.

Query laws, extract obligations, compare jurisdictions, and generate summaries in minutes—with full audit traceability.
