

# Carbon Reduction Plan

**Supplier's name:** Newton's Tree Ltd

**Publication date:** 13th of February 2026

## Commitment to achieving Net Zero

Newton's Tree Ltd (Newton's Tree) is committed to achieving Net Zero by 2045.

Newton's Tree recognises digital healthcare can have a positive and negative environmental impact. For example, it can reduce patient travel whilst increasing energy consumption. Therefore, we welcome the environmental benefits of our work whilst remaining committed to taking actions to decrease the negative environmental impact of our work.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline year:</b> 2025	
<b>Additional Details relating to the Baseline Emissions calculations.</b>	
<p><b>Background</b> Newton's Tree Ltd employees primarily work from home, with commuting into leased office space a varying number of times a month. Therefore this baseline accounts for the Green House Gas emissions (GHG) from these activities.</p> <p>Assets are leased to our customers to ensure we can securely deliver our service locally, and therefore GHG emissions from the transportation and use of these assets are also incorporated.</p> <p>Finally, Newton's Tree employees travel internationally to, for example, present at academic conferences. The GHG created by travel and accommodation have been incorporated.</p> <p>All of Newton's Tree's activities are within Scope 3.</p>	
<b>Baseline year emissions</b>	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
<b>Scope 1</b>	0
<b>Scope 2</b>	0
<b>Scope 3</b> The following sources are included: <ul style="list-style-type: none"><li>Category 6: Business travel</li></ul>	<b>59.9</b> (7.15 tCO <sub>2</sub> e per employee)

<ul style="list-style-type: none"> <li>• Category 7: Employee commuting</li> <li>• Category 8: Upstream leased assets</li> <li>• Category 9: Downstream transportation and distribution</li> <li>• Category 13: downstream leased assets</li> </ul>	
<b>Total Emissions</b>	<b>59.9</b>

## Current Emissions Report

<b>Reporting year: 2026</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b>
<b>Scope 1</b>	<b>0</b>
<b>Scope 2</b>	<b>0</b>
<b>Scope 3</b> The following sources are included: <ul style="list-style-type: none"> <li>• Category 6: Business travel</li> <li>• Category 7: Employee commuting</li> <li>• Category 8: Upstream leased assets</li> <li>• Category 9: Downstream transportation and distribution</li> <li>• Category 13: downstream leased assets</li> </ul>	<b>255.3</b> (7.51 tCO <sub>2</sub> e per employee)
<b>Total Emissions</b>	<b>255.3</b>

## Emissions reduction target

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We project that, after initial growth, carbon emissions will decrease over the next five years to 45.9 tCO<sub>2</sub>e by 2030. This is a reduction of 23%

## Carbon Reduction Projects

Our Carbon emissions come from two activities, internal processes and external product use, and therefore our carbon reduction projects aim to address these.

### Environmental policy

Improved processes that reduce our carbon footprint are more impactful than carbon offsetting. Therefore, we have created an environmental policy that will inform processes such as travel decisions and product building.

### **Platform Environmental Metrics**

How products on our platform are built, and how our platform is used, will impact energy consumption. Therefore we are building features that allow users to understand and improve their products or usage.

### **Carbon Offsetting**

After processes have been improved a carbon impact will remain because, for example, laptops will always need electricity. We will therefore tackle our remaining emissions with carbon offsetting.

## **Declaration and Sign Off**

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standards for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

### **Signed on behalf of the Supplier:**

Haris Shuaib  
Chief Executive Officer, Newton's Tree Ltd  
Date: 13 February 2026
