

New Headwall Systems

Paladin Healthcare introduces a new line of high style headwall systems which are completely integrated with our Evolution equipment rail system.

The new Paladin Headwall Systems connect technology with design, and link patient satisfaction with aesthetics. The technology is easily configurable, scalable and adaptable to any healthcare environment, combining sophisticated design, clinical flexibility and expandable infrastructure.

Headwalls are also available in full wall, vertical, horizontal and free-standing power column options. Our Fairfield-style medical equipment management rails and accessories are also available for use with Modular, AMICO, HSI and Hill-Rom rail systems and headwalls.
