

TOP 10 WHITE RHINO PRODUCTS

High-quality parts for waterworks & plumbing wholesalers.

#1 T-HEAD BOLTS

We stock a large selection of imported and domestic t-head bolts for waterworks applications. Available in multiple sizes and materials, including plain, 304 and 316 stainless steel, and Xylan coated.

#2 MJ BOLT PACKS

Our packaged mechanical joint packs include an MJ gasket, t-head bolts, and nuts that meet all AWWA specifications. Available in multiple sizes and materials.

#3 FLANGE BOLT SETS

Packaged flange bolts include the bolt and nut and are available in multiple sizes and materials to fit your needs, including A-307 Grade A, Grade B, Grade 5, 304 and 316 stainless steel, and zinc plated.

#4 FLANGE PACKS

Our flange packs come with your choice of gasket, flange bolts, and nuts. Select from a wide range of bolt and gasket sizes and materials that meet AWWA requirements.

#5 BRASS METER FLANGES

Our brass meter flanges can be purchased individually or as a kit that includes stainless steel bolts, nuts, and a drop-in gasket. The brass meter flanges are NSF-61-G lead-free certified.

#6 BRASS METER COUPLINGS

Lead-free, NSF-61-approved brass meter couplings are available in a wide range of sizes, from 5/8" to extended lengths up to 8-1/2". Reducing and 90° elbow couplings are also available.

#7 METER FLANGE BOLT SETS

Meter flange bolt sets include bolts, nuts, and gaskets. Choose from a large selection of sizes and materials.

#8 METER BUSHINGS

Our lead-free brass bushings are NPSM threaded and available in sizes 5/8" up to 1-1/2".

#9 PIPE INSERTS

Pipe inserts are used to help make a secure seal between a pipe and fitting and help support plastic pipe connections. Available in plastic or stainless steel in a variety of sizes.

#10 MARKING TAPE

We supply multiple sizes of marking tape used to help protect underground assets from accidental damage. Detectable and non-detectable options are available in a variety of colors for specific usage.
