Modern data centers recycle water similarly to how car washes recycle water. Many facilities fill their cooling systems once and reuse the same water for up to 10 years. Some newer facilities use gel-based cooling systems that require minimal water.

Q16. Does knowing this information change your view of data centers?

When technology companies build data centers in a community, they often invest in upgrading local electrical infrastructure including transmission lines and grid modernization, create community investment funds that support local charities and programs, and bring construction and operations jobs to the area.

Q20. Does knowing about these community benefits change your view of data centers being built near your community?

Much less likely to support data centers	8%	5%	8%	14%	7%	7%	8%	12%	13%	4%	9%	19%

Q28G. Below are some arguments for and against data centers. For each, say whether it would make you more likely to support data center construction or less likely to support data center construction.: Growth – AI will keep America's economy growing. Economic growth means more jobs, more prosperity and more opportunity.
