Brief Description of Project:

This project includes excavation and building of a roofed heavy use area/waste storage facility and associated Best Management Practices (BMPs) for a dairy operation. The proposed structure is 46' x 100'. BMPs include but are not limited to waste storage facility, heavy use area protection, roof and covers, roof runoff structures, access road, animal trail and walkway, underground outlet, subsurface drain, rock lined outlet, and pasture water system (pipeline and troughs).

Prevailing wage rates apply. The estimated cost is between \$275,000 - \$375,000. Target construction is late 2025/early 2026. Additional information regarding this project will be included in the RFP and bid package.
