Announcing the London Neighbourhood Explorer

The London Neighbourhood Data Explorer brings a wide range of public data together in one place, organised around London's neighbourhoods — so anyone working in neighbourhood health & care gets insights on their area clearly, quickly, and for free.

We have spent years making rich local data publicly available, but the information is scattered across dozens of sources. Mapping all those sources to London's new neighbourhood boundaries takes **days of specialist analyst time**. The Explorer closes that gap, once, for the whole of London.

WHAT YOU CAN DO

-  **Map** every neighbourhood in London
-  **Explore** population, age, ethnicity, health, deprivation, crime and more
-  **Compare** neighbourhoods across a borough, place or care system
-  **Benchmark** any area against its borough, its care system and the London average
-  **Export** your charts straight into PowerPoint for your next meeting

ALL FROM PUBLISHED SOURCES

ONS Census 2021

Free to use • No NHS login • No sign-off needed • Public data only • No patient data

Developed as part of the London Neighbourhood Health Delivery Programme — a partnership between the NHS and London Councils — as one shared evidence base for health & care in London. Built by PPL.

What could you do with it?

169 indicators

Population & Demography 24

Age structure · ethnicity · household composition · language · migration

Health & Wellbeing 80

Long-term conditions · GP-registered population · disease prevalence

Social Factors & Wider Determinants 41

Deprivation · income · employment · housing · fuel poverty

Safety & Crime 17

Recorded crime by type, month by month

Environment & Access 7

Transport stops · cycle docks · air & energy · flood risk

A FALLS-PREVENTION LEAD

Target services where they're needed.

Pulls the over-65, deprivation and long-term-condition picture for every neighbourhood in the borough — charts straight into the planning deck.

A VCFSE ORGANISATION

Evidence local need in a bid.

Bidding for a wellbeing contract, they show the neighbourhood's age, ethnicity and deprivation profile — proof they're best placed to serve it.

A NEIGHBOURHOOD PLANNER

Decide where resources go.

Before siting a new hub, they benchmark candidate neighbourhoods side by side against the borough and London.

AN ANALYST

Get a baseline in minutes, not weeks.

They pull a like-for-like baseline for every neighbourhood in London, on the agreed boundaries, ready to go.

A PRIMARY CARE TEAM

Understand your whole population.

They explore who actually lives in their neighbourhood — not just who walks through the door.

You asked. We added.

The Explorer is a living tool, shaped by the people who use it. We've already added two new datasets based on user suggestions. **Use the feedback button on the website to submit your own requests.**

Digital exclusion

Who risks being left behind as services move online — covering digital access, affordability, skills, and trust.

NHS England Digital Exclusion Risk Atlas

Community resilience

The strength of an area's social fabric: civic assets, connectedness, and an active, engaged community.

Community Needs Index (OCSI with Local Trust)
