- Safety lock-down bolts to secure bars once squeeze is complete
- Jaw profile will not cut or shear steel pipe
- Air over hydraulic pump kit. c/w needle valve, pressure gauge, filter regulator lubricator and 20' hoses

C36S

The C36S is a reliable, heavy-duty squeeze-off tool designed for emergency response situations involving 3" to 6" steel pipe.

The C36S rugged design and compact profile, powered by dual-acting hydraulic cylinders, allowing crews to quickly and effectively isolate sections of pipe in emergency situations.

Featuring a bottom swing-out bar with a positive locking design, safety blocks that prevent shearing or cutting the pipe, and lock-down bolts that maintain squeeze integrity even after the hydraulic system is disconnected.

The C36S can be operated using either an air-over-hydraulic single-speed pump or our standard manual hand pump. Offering flexibility based on operator preference.

SIZE (DIAMETER)	OPERATING PRESSURE	WIDTH	HEIGHT (EXTENDED)	WEIGHT
6"	10,000 PSI (MAX)	39.5"	26.6"	270 lbs
