

COMPLIANCE SERVICES

- OQ Exam Proctoring
- OQ Performance Evaluations for Most Covered Tasks

OPERATOR QUALIFICATION SERVICES

EGW Utility Solutions is a third-party provider of Operator Qualification (OQ) services with a team of accomplished professionals located throughout the nation. We have partnered with Industrial Training Services (ITS) and Energy WorldNet (EWN) to become an Approved Provider (AP) of their OQ training and evaluations. These organizations are considered the gold standard for OQ learning management within the industry.

We are approved for contractor OQ and Fusion services for numerous operators across the U.S., with evaluators who are among the most experienced in the industry. Our team helps ensure the safety, accuracy, and integrity of the compliance process. EGW's mobile evaluators can provide services on-site at your place of business or at our training facility located in the Dallas-Fort Worth Metroplex.

To better support customers in Kentucky and the surrounding region, EGW has also opened our new Kentucky Compliance Center in Louisville. This facility gives local contractors and utility professionals convenient access to OQ training, evaluations, compliance support, and hands-on learning resources without the need for extended travel.

We can accommodate most OQ or training needs quickly and efficiently, including bilingual training and testing needs.

- Polyethylene Pipeline Fusion Training & Certification
- Annual PE Fusion Recertifications
- Fusion Equipment Inspections

POLY-FUSION TRAINING & CERTIFICATION

In addition to OQ Services, EGW offers comprehensive third-party training, testing, and certification for Polyethylene Pipeline Fusion. We are an approved provider of fusion training and testing services for multiple operators, and our training and evaluation services can be conducted either on-site or at our well-equipped training facility.
