ARTWORK CONNECT

Streamline your packaging workflow

Managing dozens of artworks at once? Juggling files, workflows and stakeholders across teams? Artwork Connect connects every step of the packaging process in one centralised workflow, for every stakeholder involved. Version control, task overviews, project management and online proofing all run in the same environment, with one source of truth for files and status.

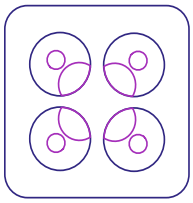

From concept to launch, brand managers, packaging managers and prepress teams collaborate without email chains, missed versions or last-minute surprises.

WHAT WE DELIVER	WHAT WE DELIVER	WHAT WE DELIVER
33%	**50%**	**25%**
fewer approval rounds per artwork, per cycle	**faster time-to-market** on new SKUs and re-runs	**fewer hours per cycle** on every artwork run

Measured across clients including Biscuit International, Jumbo and Farm Frites.

Get to know our software

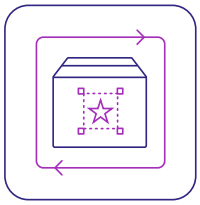

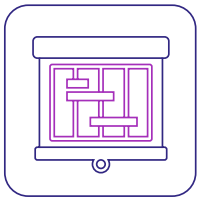

Stakeholder Alignment
Work from one source of truth to align all internal and external stakeholders.

Data Centralisation
Have all your packaging data centralised to ensure that you work with the right version.

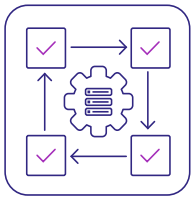

Brand Consistency
Create consistency in brand appearance through all your creative channels.

Project Management
Never waste time due to a lack of visibility into other stakeholders's work.

Task Automation
Never lose time again to the repetitive manual tasks that are simple to automate.

Trusted by leading retailers, brands and private label

the Greenery · LIDL · BISCUIT INTERNATIONAL · JUMBO · FARM FRITES

You are live within one month

Onboarding, configuration and team training included.
From kick-off to your first live projects in four weeks.
