Medior Software Developer – Shape the Future of VR and Robotics!

Are you a talented and passionate software developer eager to work on groundbreaking technologies? Do you want to be part of a team that is shaping the future of VR, AI, and Robotics? Manus Technology offers you the opportunity to make a significant impact as a Medior Software Developer.

Why Manus?

At Manus, we don't just build products—we engineer the future. As a market-leading scale-up, we create advanced human-interface solutions that power everything from next-gen animation to real-time robotic control. Our data gloves are the gold standard in VR and motion capture, used by top innovators worldwide.

We are a fast-growing company with a startup vibe, where creativity and collaboration are at the heart of everything we do. On Thursdays, some of us cook together, wins are regularly celebrated as a team, and your growth? That's our priority.

Your job as a Medior Software Developer

As a Medior Software Developer, you will collaborate with a team of engineers to design, architect, and implement cross-platform solutions for the live streaming of hardware data across various platforms and applications, such as ROS2, Unity, Unreal Engine, and various Motion Capture tools. This is your chance to deepen your systems knowledge and contribute to the exciting domains of Robotics, AI, and Virtual Reality.

What You'll Be Doing

- Participating in architectural design for new products in a fast-moving and growing company.
- Implementing new features in a scalable, future-proof manner.
- Mentoring junior developers through code reviews and by setting a positive example.
- Collaborating with other teams (marketing, hardware) to gather and supply product requirements.

Who are you?

- BSc or MSc in Computer Science or a related field.
- 3-6 years of experience.
- Strong expertise in C++.
- Solid knowledge of agile methodologies and a desire to implement excellent development processes.
- Excellent communication skills.

What We Offer

- A front-row seat to new tech—working with NASA, Ford, Rolls-Royce, and more.
- Join a collaborative, forward-thinking team with global impact.
- A competitive salary that matches your experience and knowledge
- 27 vacation days based on a full-time working week (40 hours).
- Holiday allowance of 8%
- Modern pension.
- A warm, informal workspace within a growing organisation
- Working in a technical environment with great products and talented colleagues.
