

# Senior Software Developer – Shape the Future of VR and Robotics!

Are you a talented and passionate software developer eager to work on groundbreaking technologies? Do you want to be part of a team that is shaping the future of VR, AI, and Robotics? Manus Technology offers you the opportunity to make a significant impact as a Senior Software Developer.

## Why Manus?

At Manus, we don't just build products—we engineer the future. As a market-leading scale-up, we create high-tech, human-interface solutions that power everything from next-gen animation to real-time robotic control. Our data gloves are the gold standard in VR and motion capture, used by top-tier innovators worldwide.

We're a fast-moving company that still has a startup vibe, where creativity and collaboration fuel everything we do. On Thursdays some of us cook together, wins are regularly celebrated as a team, and your growth? That's our priority.

## Your job as a Senior Software Developer

As a Senior Software Developer, you will work with a team of engineers to design, architect, and implement cross-platform solutions for the live streaming of hardware data across various applications, such as Unity, Unreal Engine, and Motion Capture tools. This is your chance to apply your fundamental systems knowledge to the exciting domains of Robotics, AI, and Virtual Reality.

## What You'll Be Doing

- Creating architectural designs for new products in a fast-moving and growing company.
- Implementing new features in a scalable, future-proof manner.
- Mentoring junior developers through code reviews and by setting a positive example.
- Collaborating with other teams (marketing, hardware) to gather and supply product requirements.

## What We're Looking For

- MSc or BSc in Computer Science or a related field.
- 7+ years of experience.
- Strong expertise in C++.
- Extensive knowledge of agile methodologies and a desire to implement excellent development processes.
- Excellent communication skills.

## What We Offer

- A front-row seat to new tech—working with NASA, Ford, Rolls-Royce, and more.
- A competitive salary aligned with your experience and expertise
- Holiday allowance of 8%
- 27 vacation days based on a full-time working week (40 hours).
- Modern pension
- A warm, informal workspace within a growing organisation
- Working in a technical environment with great products and talented colleagues.
- You can join our cooking club every Thursday for lunch + playing card or board games.
