Quality and sustainability

100% stainless steel construction, robust and easy to clean.

Dialogue system

Maximum efficiency with clear operational indication.

Stainless steel pan

Pressed from one piece of metal without welding and with rounded corners to allow easy cleaning and guarantee optimum hygiene.

Economy & ecology

- Maximum insulation for 100% efficiency, no energy loss.
- ECO mode for economical preheating and melting of solid fat.
- Decreased oil capacity for maximal optimisation.

Drain tank

With cool zone under the heating element for waste recover and oil saving. Waste elements do not burn and oil degrades less quick.

Temperature

Ajustable temperature from 95°C (cleaning mode with water) to 190°C.

General information

- Simple and effective power adjustment thanks to the pulse regulator. The heating power can be continuously adapted, even when the water is already boiling.
- Its strong heating power in a compact volume enables fast warming up.
- Pivoting heating element, enables easy daily cleaning.
- With dosing valve, can be connected to a fresh water inlet.
- Simple control button.

Technical information

Pan	20 litres
Dimensions*	345x575x315mm
Net weight	22kg
Voltage	3x400V
Kilowatts	4,5kW
Fuses	11,3A

Baskets

Supplied with
4 round baskets

**More basket choices,
available at additional cost:**

- 7 small rectangular

Option

Support table (390x580x590mm)
with G/N containers storage possibility.
