

# CASCADES™

Cascades™ is an operating system and critical infrastructure for Whole Child Multi-Tier Systems of Support (MTSS) to personalize interventions and learning pathways

Feature	Cascades™	LinkIt!
<b>Core Focus</b>	Whole-child MTSS platform that bridges quantitative data and qualitative contextual insights for risk/ need identification	Data aggregation and assessment platform focused on academic and state testing data
<b>Primary Use Case</b>	Early identification, intervention planning, progress monitoring, and multi-disciplinary decision-making	Assessment reporting, benchmarking, and academic data analysis
<b>MTSS Support</b>	Built specifically for MTSS workflows for tiered supports in academics, behavior, SEL, mental health, and attendance; AI decision support for MTSS Program teams.	MTSS features available as extensions to core reporting tools
<b>Universal Screening</b>	Normed universal screening tools with end to end intervention referral management	Limited SEL functionality
<b>Behavior &amp; Attendance</b>	Integrated into MTSS dashboards and intervention workflows	Available for reporting; not typically central to workflows
<b>Intervention Management</b>	Assigns, tracks, and evaluates Tier 2/3 interventions: AI decision support and assistance to interventionists.	Focuses on outcome reporting rather than intervention management
<b>Collaboration</b>	Designed for multidisciplinary student support teams	Primarily used by instructional and data teams
<b>Equity Insights</b>	Highlights disparities across student groups, supports, and outcomes	Disaggregated reporting based on user-configured views
<b>Staff Capacity</b>	Supports caseload visibility and service capacity planning	Not designed for caseload or service capacity management
<b>Platform Orientation</b>	Proactive MTSS system supporting early, coordinated intervention	Academic data infrastructure supporting assessment and accountability
<b>Personalization</b>	Incorporate student strengths, interests, social and cultural context to personalize intervention and learning	Data-driven rather than context-based

## Discover Cascades™ Today
