

Heritage detail. Modern comfort.

Slim steel-look windows, designed for modern living.

A slimmer frame. More of the view.

Slim aluminium frames bring the character of traditional steel windows to period homes and contemporary spaces. Choose the layout and finishing details to complement your home.

Comfort built in

Thermally broken frames help reduce heat transfer.

Low maintenance by design

Durable aluminium resists rust and warping with minimal upkeep.

Manufactured in Britain

Classic Grid

Finishing touches

Explore colours, glass and Art Deco handle options with your installer.

Internal or external glazing bars add definition and character.

Performance, clearly explained.

FEATURE	REFERENCE SPECIFICATION	WHAT IT MEANS
Thermal performance	U-value: 1.3 W/m ² K*	Helps limit heat loss through the window.
Energy rating	Band B*	An overall window energy rating.
Security	PAS 24*	Tested resistance to forced entry.
Weather performance	BS 6375-1:2015*	Testing for air, water and wind resistance.
Top-hung opening sash	Up to 1400 × 1400mm*	Hinged at the top; opens outwards.
Side-hung opening sash	Up to 700 × 1400mm*	Hinged at the side; opens outwards.
Trickle vents	Available	Background ventilation with windows closed.

*Dimensions are width × height. U-values, overall performance and maximum sizes vary depending on the window configuration, glazing and hardware. Please confirm the specification and performance of your chosen windows with your installation company before ordering.
