

Empower clinicians to work smarter and optimize revenue with clinical AI.

Avo's AI Platform seamlessly embeds in the EHR and leverages local institutional knowledge.

CHART ASSIST

Streamline workflows like admission, discharge, rounding, & pre-charting

Chart Assist saves clinicians time and improves clinical documentation by automating chart review, surfacing care gaps, and drafting notes and treatment recommendations.

Partnered with 

AI SCRIBE

Reduce burnout & improve clinical capacity with ambient documentation

AI Scribe provides HIPAA-secure ambient listening that pulls patient records and sends reimbursement-ready notes back to the EHR automatically.

Supports 50+ Languages

ASK AVO

Get context-aware answers to clinical questions during care

Ask Avo answers clinical questions and executes clinical tasks, from providing differential diagnoses to drafting prior authorization, all within the EHR.

Partnered with 

E&M OPTIMIZER

Maximize reimbursement & reduce billing cycles with E&M optimization

E&M Optimizer evaluates documentation against the 2021/2023 E&M guidelines, flags gaps in real-time that would force a downcode, and proposes smarter code selections so clinical teams capture full reimbursements.

Proven results

\$11.6M

Annual cost savings

Multi-national ambulatory org

35%

Less note time per patient

Large inpatient hospital
