CONNECTING SENSORS. CREATING CLARITY.

With Seacurity, dotOcean brings radar, cameras and AIS data together in one operational picture helping your team monitor maritime activity, assess potential threats and make informed decisions.

.Ocean

SEACURITY

PROTECT YOUR MARITIME
INFRASTRUCTURE

TURN AWARENESS INTO ACTION.

Give your team the visibility and timely information they need to protect your maritime infrastructure.

01 CONNECTED SENSORS

A distributed network across fixed infrastructure, crewed and uncrewed vessels, above and below water.

02 AI-POWERED DETECTION

Automatic detection and sensor data fusion to reduce operation workload.

03 SHARED SITUATIONAL AWARENESS

A sensor data sharing platform for infrastructure owners and state actors.

04 RAPID THREAT VERIFICATION

Deploy sensor-equipped USVs to investigate potential threats, verify dark vessel detections and cover blind spots.
