

MILOS MILANOVIC

PROFILE

I'm a Webflow Developer with 6+ years of freelance experience building marketing sites, SaaS landing pages, and corporate websites for clients across Europe and the US.

I work from Figma or design directly in Webflow - whichever the project needs. Every build I ship is responsive, CMS-structured, and handed off clean enough for clients to manage on their own.

Before going full-time freelance, I managed an IT department at a national-level organization, which means I understand systems, deadlines, and working within structured teams.

Skills

- ◆ Web Development
- ◆ Web Design
- ◆ Webflow Proficiency
- ◆ HTML/CSS
- ◆ SEO Optimization
- ◆ UI/UX Design
- ◆ Client Collaboration
- ◆ CMS Management
- ◆ Attention to Detail

EMPLOYMENT
HISTORY

Webflow Developer at Freelance

As a freelance Webflow developer, I have successfully designed and built custom websites for a diverse range of clients. Highlights include creating the [Shortlist IQ](#), [Raj Ibelik](#), [Olovka AI](#), [V-Limo](#), [Teract AI](#) and [my portfolio website](#), which demonstrates my expertise in responsive design and performance optimization. Collaborating with clients worldwide, I focus on crafting visually appealing, functional, and user-friendly websites tailored to their specific needs.
