Gather website analytics from different source like google analytics to have more granular insights about website visitors, integrated with your other sources of data and revenue streams.

Add AI to your workflows seamlessly that blends with your business model and workflows.

The image displays two overlapping screenshots of the Retool interface. The background screenshot shows a workflow for a '2022 Inventory Dashboard'. It starts with two data sources: 'S3 Input AWS aws' and 'IMPORTED Walmart Dataset'. These feed into a 'UNION' step with the text 'This is what is happening'. The workflow then passes through a '2' step, a 'SELECT' step with the text 'This is what is happening', and finally an 'EXPORTED Output AWS aws' step. Below the workflow is a table view with columns: Product (Name / D...), SKU / Unique Item ID, Channel / Location, and Quantity. The table contains five rows of data for 'Double Chocolate Co...' at 'Walmart' with a quantity of 359.0. A 'Deduplicate' tooltip is visible over the 'Quantity' column.

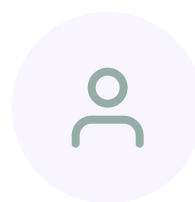

The foreground screenshot shows the configuration for a 'New trigger'. The trigger is set to 'Update stage' for 'Salesforce leads'. The condition settings are defined as follows:

- Opportunity ID is equal to 24902390229
- Expected amount Equals to 175,000
- Fiscal year Is bigger than 175,000

Buttons for 'Add rule', 'Add inner group', and 'Run Query' are visible at the bottom of the configuration panel.

# OUR CLIENTS

Retoolers streamlined our Amazon operations, uniting tools into a single dashboard. Managing 100,000+ products is now efficient and insightful. Huge time-saver!

**Anthony Chan**  
CEO at Sage Republic

Retoolers transformed our data management with a simple, efficient dashboard that fit seamlessly into our setup. Teamwork and updates have never been easier!
