

— INDIVIDUAL CAPABILITY. SHARED VALUE.

Make great work repeatable.

Build your system for working with AI. Expand what you can take on.

Turn the ways you think, create and solve problems with AI into methods you can use, improve and build on.

AI Agility

Build, adapt and improve
your Human × AI collaboration system.

AI Foundations

Human-First AI Literacy
Human × AI Fluency

47

Modules across the
three programs

24

Hours of learning
across the three programs

12 months

Access to the
Directing Intelligence Community

The complete learning package includes AI Agility and both AI Foundations programs. Use the Foundations as needed; they are not prerequisites. Allow additional time for applied practice.

Learn independently, with your team or through a higher education partner.

HUMAN JUDGMENT. AI POSSIBILITY.

FROM USING AI TO DIRECTING THE COLLABORATION

Your best approach. A system you can build on.

Define the outcome, provide useful context and set the standards for good work. Direct the collaboration, evaluate the result and refine what works, so the next task starts from experience.

AI AGILITY · 20 CORE MODULES

Develop your approach.

Build the capability to choose, adapt and improve how you work with AI as the work and the tools change.

Make good work repeatable.

Spend less effort rebuilding context and instructions. Keep the methods that work.

See more before you decide.

Explore alternatives, test assumptions and bring more perspectives into the work.

Stand behind what you deliver.

Define quality up front. Check the result against evidence and standards you understand.

Make room for what matters.

Reduce repeated setup and rework. Put that capacity into opportunities worth pursuing.

AI FOUNDATIONS · INCLUDED

A stronger starting point.

Build or refresh your understanding and strengthen everyday collaboration with AI.

Human-First AI Literacy

Understand AI and use it responsibly. Build the understanding that supports your next step.

Human × AI Fluency

Build confidence in everyday collaboration. Strengthen how you work with AI on familiar tasks.

Included, not prerequisites.

Use either program as needed. You do not have to complete them before AI Agility.

47 modules. 24 hours.

Across AI Agility and both AI Foundations programs. Applied practice takes additional time.

What you leave with

Artifacts and ingredients for a Human × AI collaboration system built around your work: a clear brief, reusable context and instructions, and criteria for reviewing the result. A system you can explain, evaluate and keep improving.

— AGENTIC GUIDANCE. HUMAN OWNERSHIP.

Meet Virgil.

Learning that builds on you.

Your Agentic Learning Guide for applied practice. Each module shapes when Virgil leads, challenges, supports or steps back. You do the thinking and make the decisions.

01 Learn an approach.

THE LEARNING

A focused lesson introduces the skill. Bring a project, a problem or an idea to make the practice relevant.

THE CONTEXT YOU BRING

You want to make your weekly project updates more useful to the people reading them.

02 Practice with Virgil.

THE LEARNING

Work through an applied exercise. Virgil guides the practice, helping you put the lesson to work in your context.

A QUESTION TO WORK THROUGH

What should your team be able to decide after reading the update? Define that before shaping the brief.

03 Use it in your work.

THE LEARNING

Build something useful for your own goals. Connect the new skill to work you have already started.

THE WORK YOU BUILD ON

Your update has a clear audience, purpose and brief. Decide what you will check to know whether it supports the intended decisions.

04 Reflect and improve.

THE LEARNING

See what worked and refine your approach. Keep the useful context, instructions and review criteria.

THE NEXT STEP

Consider which parts of the brief could become a repeatable workflow, and where you would keep a human decision.

Build with continuity.

Your goals, work and progress can inform learning across modules and courses.

Your memory belongs to you.

You stay in control of what Virgil remembers as you keep learning.

Illustrative project-update walkthrough, not a reported participant outcome.

— ONLINE LEARNING. APPLIED TO YOUR WORK.

Your pace. Your context. A clear next step.

ON YOUR OWN

Make learning part of your week.

Work through the lessons and applied exercises at your own pace. Bring your goals and projects, with Virgil guiding the practice.

WITH YOUR TEAM

Bring a shared purpose.

Private asynchronous cohorts connect the learning to your organization's context and priorities. Build methods colleagues can use and improve.

THROUGH A PARTNER

Learn through a trusted institution.

Take part through a higher education partner. We'll help you find or confirm the right enrollment route for your learning.

Available online and through the humanskills.ai app. Access and login information are provided when you register.

**AI keeps moving.
So will you.**

Keep growing with Directing Intelligence.

Your learning includes **12 months access to the Directing Intelligence Community**. Stay connected as you apply your skills, share practical experience and explore new possibilities.

A higher education partner certificate is included on completion. The issuing partner is confirmed through your enrollment route.

Explore AI Agility.

Review the learning experience and find your starting point. Build a better way to work, then build on it.

Employers are welcome to bring a team. Share your people's roles, priorities and the work you want to improve.
