

CHILDHOOD DEVELOPMENTAL SCREENING

Little Steps, Big Future.

Early childhood is full of important milestones – how your child moves, speaks, plays and interacts. If you have ever found yourself quietly questioning their development, you are not alone.

Empower yourself with knowledge through a childhood developmental screening, do not let small questions become big worries.

Recommended for parents seeking an initial assessment for conditions such as:

- Attention Deficit Hyperactivity Disorder (ADHD)
- Autism Spectrum Disorder
- Global Developmental delay
- Intellectual Developmental Delay
- Language Disorder

\$\$350 NETT*

WHAT'S INCLUDED:

Initial consultation with a child development specialist

Childhood developmental assessment

Coordination with allied health professionals for further assessment, if required

OUR TEAM

Our multidisciplinary team, led by Dr Janice Wong, provides expert assessment and care for ADHD, autism spectrum disorder, speech delays and other neurodevelopmental conditions.

Dr Janice Wong

MB ChB (London, UK), MRCPC (London, UK)

Paediatrician, Neurology, Child Development

Dr Janice Wong is a paediatrician specialising in paediatric neurology and neuro-disability. Her clinical expertise encompasses the management of a wide spectrum of conditions affecting newborns and children, with a focus on paediatric neurology and childhood behavioural and developmental disorders, including global developmental delay, speech delay, autistic spectrum disorder and ADHD. As Chairman of the Cerebral Palsy Alliance Singapore, she is dedicated to improving the lives of children with neurological conditions.

Dr Wu Lin Chieh
